

No bells and whistles. A simple dependable device!

Resilience C is a natural salt water chlorinator developed for homeowners wishing to install a simple, easy to operate device. This modest, dependable salt water chlorinator offers reliable pool sanitation leaving you more time to swim, bathe and relax.

Features:

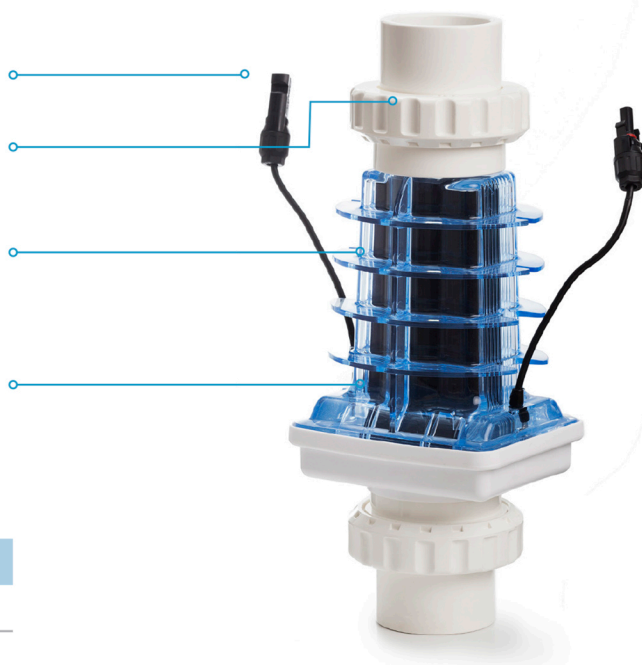

- 24 hrs Turbo chlorination mode
- 4 levels of chlorine production
- 4 warning signals
- Light weight (only 8.8 lb)
- Totally sealed and splash proof
- Works at full capacity at ambient temperatures of up to 122°F
- Automatic reversed polarity for keeping blades clean
- Winter protection mode
- Automatic identification of feeding voltage 110V - 220V

Works with low current relieving stress from the blades

Gripping fins that enable assembly and dismantling
- no tools required

Reinforcement ribs that provide strength and can
withstand pressure of up to 100 psi

Transparent cell for periodic visual inspection

Choosing the Correct Cell Model for Pool Size

Cell Model	C18	C40	C60
Maximum pool size in gallons	18k	40k	60k
Chlorine Output lb/24h	0.75	1.38	2.07

In order to choose the most suitable cell model in the event of heightened chlorine demand (such as warmer climates, high bathers load, etc.), refer to the recommended values of a larger pool size.
