

The benefits of the Telair US Cargo Systems latest Omni-Directional Caster Assembly is now extended to the 747-400F Fleet.

As a worldwide leader in the design and manufacture for in-aircraft cargo loading systems for nearly all types of commercial freighter aircraft, this Caster Assembly is certified as PMA equipment and directly interchangeable with original equipment manufactured by UTC Aerospace Systems.

Description

Manufacturer's Part Number: 68190-101

Component Type: Caster Assembly

Maximum temperature capability

Two piece component design bolted together for use in omni-directional transfer mat or tray assemblies through a single retractable plunger for easy removal and installation

Single crowned roller design with heavy duty sealed bearings with a combined radial limit load rating that exceeds 7000 lbs

Aluminum machined frame piece designed for easy rotation that includes a race fitting with exterior lip to maintain lubrication for radial needle bearing for extended operational life

Lowest Operating and Maintenance Costs

Certification and Applicability:

Aircraft Type: 747-400F Series

Certification: FAA-PMA (Telair US LLC., Cage 81868)

Approved Replacement for UTC Aerospace Systems Part Numbers 7M32502-2 and 7M32502-3

Distributor for Telair US Cargo Systems commercial cargo component product line
