GDPR.... 2018

YOU WANT TO UNDERSTAND GDPR AND BECOME COMPLIANT

WE PROVIDE THE EDUCATION, TOOLS AND GUIDANCE TO HELP YOU MOVE TOWARDS COMPLIANCE

> OPTIMISED END-TO-END BUSINESS SOLUTIONS

Giving Shape to Ideas

WHAT IS GDPR?

- GDPR stands for The General Data Protection Regulation which is an EU wide framework which becomes enforceable on the 25 May 2018.
- Under the regulation, individuals will be "guaranteed free and easy access to your personal data, making it easier to see what personal information is held by companies and public authorities".
- The regulation aims to improve the security and access of personal information, whilst superseding personal data handling previously covered by the Data Protection Act 1988.

GDPR COMPLIANCE IS A NECESSITY

Brexit, skills shortages, currency weakness, digital transformation and productivity challenges all compete for attention within your business. But the most pressing and potentially important topic to address within your business is something known as GDPR.

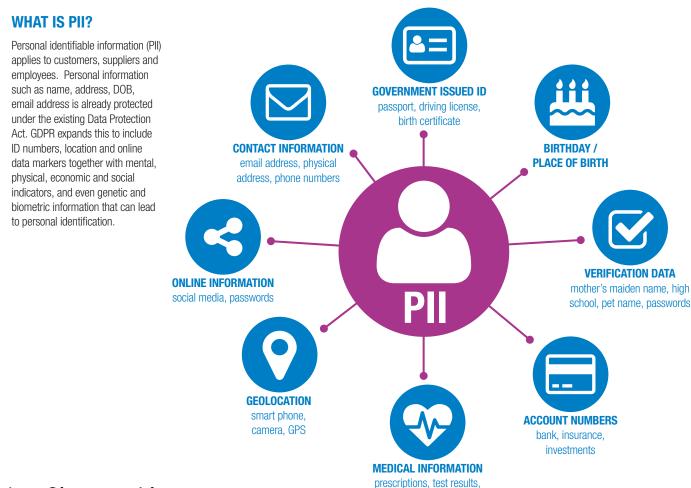

GDPR, or the EU General Data Protection Act, will come into force in May 2018, and has wide sweeping controls for how personally identifiable information (PII) is managed within a business. The regulation also has imposing fines for lack of compliance, up-to 4% of annual turnover or €20M (whichever is greater) per breach – making this a potentially costly topic to avoid dealing with.

WHAT ARE THE REAL-WORLD IMPLICATIONS TO YOUR BUSINESS?

- What personal information are you storing? Is this data used for the purposes intended?
- Where is this held?
- Who has access?
- How are cyber security and data breaches managed?
- If data is requested by a customer or employee, how will this be shared?
- Who is responsible for overall compliance?

medical records

Answering all of these questions becomes the first step towards compliance.

WHAT IS THE IMPACT OF FAILING TO COMPLY WITH GDPR?

Companies found guilty of failing to comply face fines of $\pounds 20M$ or 4% of revenue (whichever is greater).

The severity of fines will depend on the level of data breach.

GETTING STARTED WITH GDPR

0101010101010101010

1010101010101010101

DATA

- Define Personal Identifiable Information
- Map the locations of PII
- Consider centralising data storage
- Ensure all PII has an audited trail
- Define security access to all PII

SOFTWARE

- Ability to store, find and catalogue citizen's data and information
- Creation of a secure environment for data
- One version of truth approach for all information stored

PARTNERS, SUPPLIERS AND CONTRACTORS

- Check all businesses that handle your PII are GDPR compliant
- Ensure effective use of contract management with vendors

PEOPLE

- Employ a DPO (Data Protection Officer) if required
- Involve HR, legal, finance and business units alongside IT

PROCESS

- Define a clear plan for reporting data breaches
- Citizens now have a right be forgotten, therefore ensure their PII can be deleted
- Provide a transparent process to a response for information

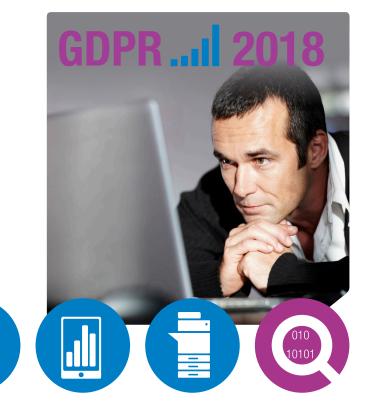

KONICA MINOLTA GDPR RELATED SOLUTIONS AND SERVICES
