

Affordable, Secure and Compliant Data Storage for Law Enforcement Agencies

Industry's Lowest-Priced and Highest-Performing Cloud Storage Solution

Across the world, law enforcement agencies are adopting digital technology to enhance policing, improve public safety and save taxpayers money. Data volumes are growing exponentially as municipalities roll out electronic criminal record systems, digital fingerprinting applications, video surveillance solutions, body-worn cameras and dashboard cams.

While all this digital information is vitally important, many police departments lack the staff and budget required to retain it in a secure and reliable manner. Traditional on-site data storage systems are notoriously expensive to deploy, scale and manage. They require significant upfront capital investments, pricey maintenance contracts and specially trained IT staff. First-generation cloud storage services like Amazon Simple Storage Service (S3) eliminate equipment expense and complexity, but are still too costly and complicated for many cities and towns.

Wasabi Hot Storage Delivers Breakthrough Economics and Simplicity

Wasabi's mission is to make cloud storage a simple, open-standard commodity and utility, just like electricity. Wasabi hot storage is extremely affordable, fast and reliable cloud object storage—for any purpose. With Wasabi, you can store massive volumes of law enforcement data in the cloud, at radically low cost, while satisfying stringent security, durability and compliance requirements.

Disruptive Pricing Eliminates Big Data Storage Barriers

Specifically conceived to provide storage as a commodity, Wasabi hot storage is easy to understand, easy to order and incredibly cost-effective to scale. Unlike other cloud storage services, with Wasabi there are no confusing storage tiers to decipher and no complicated fee structures to decode.

Wasabi hot storage costs a flat \$.0039/GB/month. The only other fee Wasabi charges is for data out to the internet or to AWS Direct Connect.
