SMARTER SOLUTIONS

For The Outdoor Workforce

**THE HARSHTEST CONDITIONS
CALL FOR THE
TOUGHEST PRODUCTS.**

Our studies have shown conventional oil spill clean up materials only get utilized to 30% of their stated capacity in wet weather conditions

While troubleshooting a client's recurring environmental issues in late 2015, our founders recognized a serious deficiency in the technology used to control spills in the outdoors – most of which was designed for indoor industrial applications and has remained unchanged for more than 30 years.

What we found.....

- The bulky material took up too much space
- It was slow to deploy
- It was made of virgin materials

Worst of all....The materials you're using weren't designed for life in the outdoors!

They don't work well (if at all) when introduced to water. In fact, we've found that conventional spill control materials are only 30% as effective in water as when utilized in dry conditions.

In addition, they degrade in UV light. Unless you live in a cave, this could present some problems.

Bad news for the environment

Waste of money

Waste of time

SO OUR TEAM WENT TO WORK AND DISCOVERED...

...At the intersection of
oil and water, you find

Spilltration®

PRODUCTS

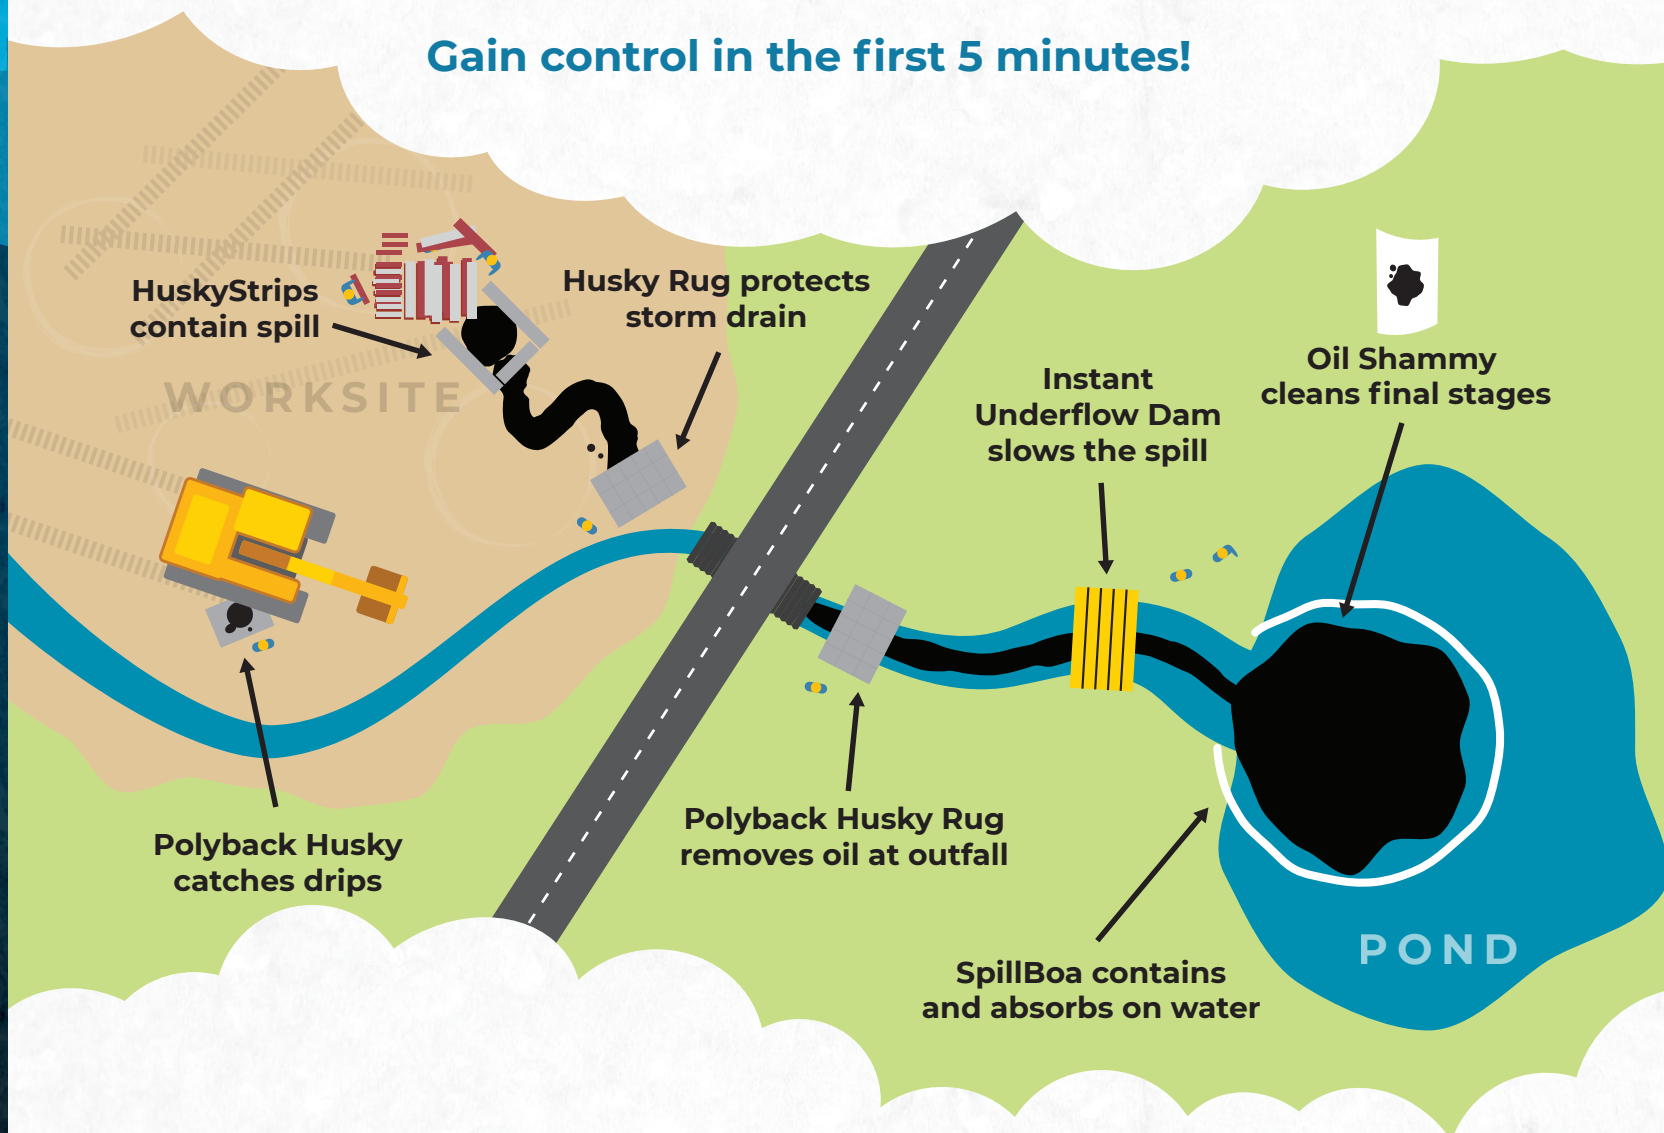

Spills spread 100X faster in water.

Fortunately, with our Spilltration family of products there is a solution no matter where the mess has spread.

And, since Spilltration takes up only 25% of the footprint of traditional materials, you are far more likely to have adequate materials on hand when the spill happens.

Gain control in the first 5 minutes!

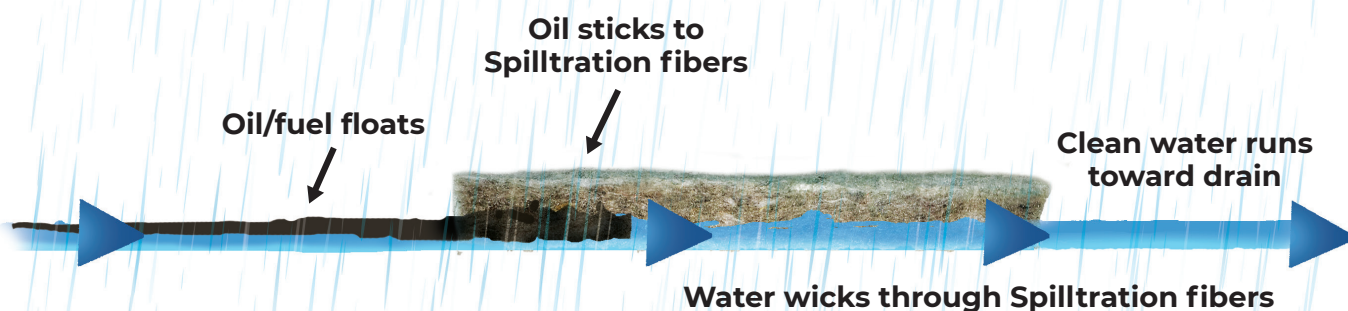

Response Time After the Spill

White Spill Pad (The Old Way)

How Spilltration Works to Contain Oil/Fuel Spills in Wet Weather (The Better Way)

Spilltration® products are made for the mobile worker in the rugged outdoors! Our materials are engineered specifically for wet-weather oil spills. Designed to trap and lock oil spills while its special fibers filter clean water. The quick spill containment results in lower costs and greater environmental protection. Why suffer the consequences of old-fashioned oil spill control systems?

Spilltration is the first ever spill control system that can clean up oil-based leaks and spills while allowing clean, clear water to filter through.

- **Absorbs Oil. Filters Water.**
- **Smooshable - Requires $\frac{1}{3}$ to $\frac{1}{5}$ the amount of storage space.**
- **Engineered for superior performance when it's raining.**
- **Absorbs hydrocarbons twice as fast.**
- **Deploys up to 40x faster than conventional spill control products.**
- **Can be wrung out and reused up to 10 times**
- **Saves time. Saves money. Protects the environment.**
- **Made from recycled materials to support your sustainability initiatives.**
- **Reduce waste up to 70%.**
- **Cuts your costs by 50% or more.**

Spilltration®
HUSKY PRODUCTS

Revolutionary Oil Spill Clean-Up

DON'T TAKE OUR WORD FOR IT...

"We had a hydraulic leak from a ruptured line on an excavator near a stream. I pulled the Spilltration materials you left with me in your office demo and I mobilized to the site. I was able to compare them to the materials already in action [traditional white spill pads]. To say your product was astounding is an understatement. My crew in the field remarked over and over about Spilltration's ability to remove the material. And the fact that your materials are compact is a real plus. Needless to say, I'm sold on the Spilltration technology."

-Alan B. Houck, CHST, EHS Field Specialist, Brubacher Excavating, Inc.

"We were called out on a rainy night to clean up over 50 gallons of transformer oil caused by a car running over a pad mounted transformer. By the time we arrived the oil had already reached a storm sewer and was heading to a retention pond.

We immediately went to the outfall and stuffed it full and lined the ditch below with Spilltration Rugs. We were able to prevent the oil from reaching the pond, saving our customer tens of thousands of dollars in clean-up costs."

-Spill Clean-Up Contractor

"Thankfully, Spilltration products have practically eliminated the spread of transformer fluid leaks by capturing and absorbing the oil, while allowing clean rainwater to filter through. In fact, they are the only products we have found that work in wet weather. Our labor, materials and waste have been cut in half."

-Substation Maintenance and Environmental Coordinator

Spilltration® Husky Pad 16"x16" Pro Case

Spilltration Husky Pads are great for sopping up the bulk of any oil or fuel spill.

Fluid Absorbed	<i>Diesel, Kerosene, Hydraulic Fluid, Motor Oil and other Hydrocarbons - Filters Water</i>
Husky Pad Dimensions	16" x 16"
Sold As	60 Husky Pads / Case
Case Contents	2 Bales of 30 pads
Absorbency	32.3 Gallons / Case
Absorbency Per	68.9 fl. ozs./ Each
Weight	19 lbs. / Case
# per pallet	22 Cases
Price	\$129.00 / Case

SPL029

Spilltration® Husky Rug 32"x48" Pro Pack Case

SPL030

Husky Rugs are made for rapid response to sop up the bulk of any oil or fuel spill. In addition to primary oil or fuel spill control, Husky Rug applications include covering storm drains or sump grates, and providing protection at outfalls.

Fluid Absorbed	<i>Diesel, Kerosene, Hydraulic Fluid, Motor Oil and other Hydrocarbons - Filters Water</i>
-----------------------	--

Husky Rug Dimensions	32"x 48"
Sold As	9 Husky Rugs / Case
Absorbency	29.1 Gallons / Case
Absorbency Per	3.2 Gallons / Each
Weight	16 lbs. / Case
# per pallet	22 Cases
Price	\$124.00 / Case

Spilltration® Husky Strip 8"x64" Pro Case

Spilltration Husky Strips are made for rapid response to quickly surround a spill or protect crucial areas.

Fluid Absorbed	<i>Diesel, Kerosene, Hydraulic Fluid, Motor Oil and other Hydrocarbons - Filters Water</i>
Husky Strip Dimensions	8" x 64"
Sold as	36 Husky Strips / Case
Absorbency	38.8 Gallons / Case
Absorbency Per	1.1 Gallons./ Each
Weight	22 lbs. / Case
# per pallet	22 Cases
Price	\$170.00 / Case

Quickly surround a spill with Husky Strips. Allows water to filter through while capturing oils and fuels.

THE HUSKY ADVANTAGE

Husky Spilltration® vs. The Other Guys

Don't spend days cleaning and remediating after a spill. Spilltration Husky allows water to continue flowing while stopping oil in its tracks.

Husky Pads sop up oil fast.

Cover storm drains with Husky Rugs to catch oil and fuel and allow clean water to filter through.

Husky Rugs filter oil spill from runoff at stormwater outfall.

SMOOOSH 'd

Save space with Spilltration® SmooshKits

WHY WE SMOOSH

HalenHardy® developed its proprietary smooshing technology to solve the common space constraints that many fleet and remote industries face. This proprietary process compresses our innovative Spilltration® material into compact packages that can fit anywhere. You can store SmooshKits™ in the smallest of spaces—under the seat, in a seat pocket or in your toolbox. The possibilities are endless.

- **Deploy 4x Faster**
- **Take up 4x Less space**
- **Produce 4x Less Waste**
- **Reduce shipping costs up to 50-75%**

5-Gallon SmooshKit (left) takes up 75% less space than old-fashioned 5-gallon spill bucket

Spilltration® 16"x16" Husky Pad Smoosh Pack Case

Spilltration Husky Pads are great for sopping up the bulk of any oil or fuel spill. Smoosh Packed to save space.

2.7 Gallons / Pack

Weight 16 lbs. / Case

per pallet 24 Cases

Price \$149.00 / Case

A Spilltration® Husky Pad attached to a mop handle sweeps the sheen from oily runoff.

"We only had enough Spilltration products for one storm drain so we used the standard oil-only pad, socks, and booms on another. The Spilltration drain had clear water flowing into it--not even a sheen. The other drain still had dirty, sooty water flowing into it. While not currently advertised to filter particulate-like, fire suppression runoff, Spilltration products certainly work well for it. If anything, HalenHardy® is underselling how great their products are."

SPL008

Spilltration®

HUSKY POLYBACK PRODUCTS

Did you know that just 4 drops of oil per minute from a leaky valve, flange or hose can accumulate to 2 gallons of oil per month?

How do you prevent oil drips and leaks from outdoor machinery and equipment from spreading in the rain? **It's easy. Use Spilltration® Poly Backed Products!**

Our Spilltration® Polyback Rugs and Pads have a rugged polyethylene backing that prevents oil from ever reaching the ground. Oil and fuel are trapped in the specialized fibers, allowing rainwater to filter out of the sides. And they're designed to hold up to 3 gallons of oil. So, they only need to be changed once a month!

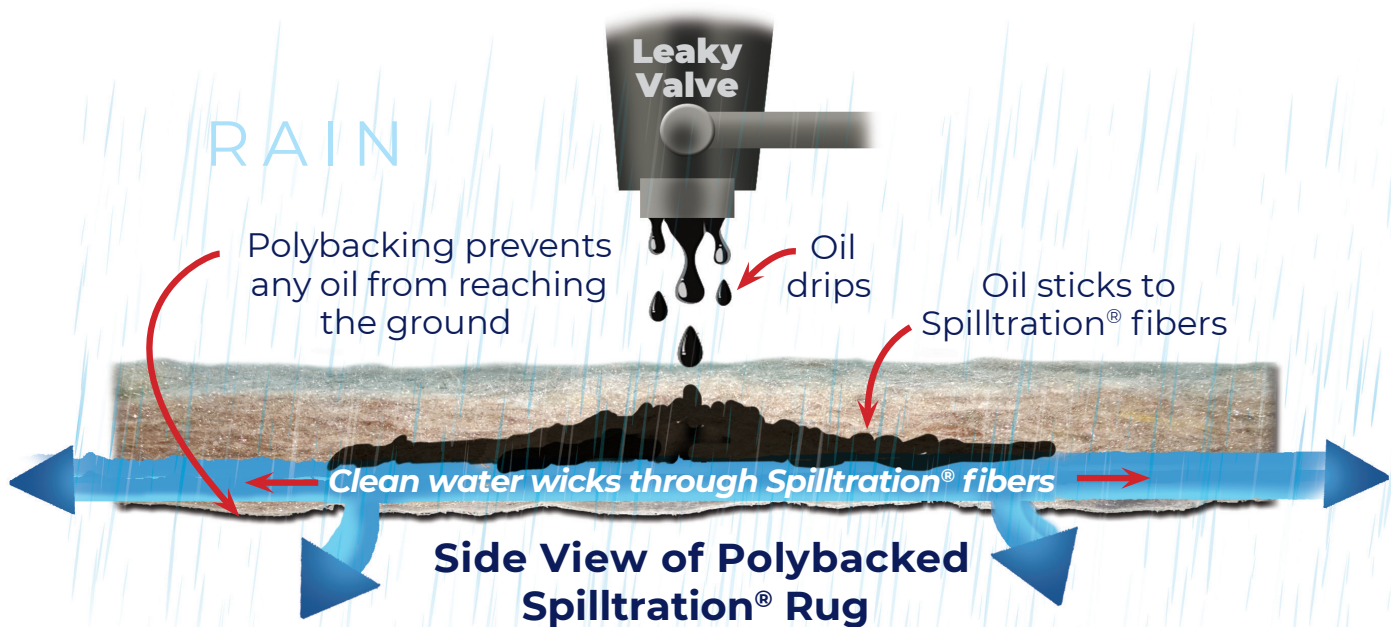

Super thick Spilltration Husky top side absorbs oils while allowing clean rainwater to filter through

"Spilltration products are the first true innovation that I have seen in two decades. They source their raw materials in an environmentally sound fashion, they know the holding capacity of their product, and if you use the poly backed product you directly address the local and federal EPA's primary concern; oil getting into the ground. Nobody else does that."

-Matt Christie, Duke Energy

How to absorb and contain outdoor oil drips and leaks

Spilltration® Husky Polyback Pad 16"x16" Pro Case

Spilltration Husky Polyback Pads are great for combating long term oil based leaks and drips in the outdoors.

Spilltration®

PRODUCTS

BGE's Ron Dove discovered Spilltration and within months nearly every truck in the fleet carried custom Spilltration spill kits.

..... *An Excerpt from Exelon Newsletter*

Oil spills are an ever-present threat to the environment. BGE employees take their commitment to environmental stewardship seriously and are ready to quickly mitigate any incident. But, conventional absorbents are heavy, slow to deploy and ineffective during wet conditions.

BGE's Ron Dove, a senior environmental scientist, in tandem with colleagues from PECO, discovered an innovative product that promised better results.

"When we found the Spilltration products and saw that they clean up spills two to five times faster, we had to learn more," explained Dove. "We found that they were faster—and also lighter and smaller."

A standard Spilltration kit, created by HalenHardy®, weighs just 14 pounds and can absorb 13 gallons of oil. One hundred pounds of standard clay absorbent or more than one hundred 15" x 20" "pads from a well-known spill products manufacturer" would be needed to clean up the same amount of oil.

"The product works in wet conditions, which is a real possibility, so a huge upgrade," observed Dove. "They're made from recycled materials and can be reused, which makes them environmentally friendly and cost effective. This product really allows us to do our jobs better."

The new kits are vacuum packed, in addition to being lightweight, making them easier and safer for employees to handle. Since March, all BGE trucks greater than ¾ ton have been required to carry the new spill kit.

** We chose not to call out the specific brand name.*

Spilltration®
OIL SHAMMY PRODUCTS

**Tough enough to remove sheens from concrete
and asphalt without falling apart**

Spilltration Oil Shammy Towels are designed for final cleanup detail on oil-based leaks and spills. Made from a lightweight, yet durable, material, the Oil Shammy Towels can hug the contours of any object, while holding up to the rigors of being wiped across concrete or asphalt. Oil Shammy Towels are smoosh-packed to compress and fit in areas up to 80% smaller than traditional oil only sorbents.

**The only sorbent on the market
capable of pulling even the fine
sheen from water**

Spilltration Oil Shammy Towels for oil-based spills are engineered to work differently than traditional oil-only spill products.

- **Soft and supple Oil Shammy Towels are perfect for wiping oily surfaces clean....especially when its raining**
- **Use Oil Shammy Towels to clean oily tools, equipment, rocks, metal, concrete...the possibilities are endless**
- **Oil Shammy Towels for oil-based spills compress to fit in an area up to 80% smaller than traditional oil spill products**
- **Because of the resilient fiber compounds, oil can be squeezed out of Spilltration products and reused many times**
- **Oil Shammy Towels also remove bulk oil and fuel spills from waters – as well as finer sheen.**
- **Substantially reduce your materials and disposal costs by wringing and reusing Spilltration products**

Spilltration® Oil Shammy Towels Smoosh Pack Cases

When a pole-mounted transformer malfunctions, the oil inside sprays and 'rains down' on whatever is in the immediate vicinity. This fine mist sticks to the vehicles below, and on crowded city streets, that's a lot of vehicles. Although the residue on vehicles is only mineral oil, it's very time consuming to clean up. Fortunately, we discovered Spilltration Oil Shammy towels. They do a superior job compared to anything we've ever used before, and they cut our cleanup time in half.

—Environmental Coordinator,
Electric Power Company

Spilltration Shammy Towels in space saving Smoosh Packs. Great for sliding in a tool box drawer, or behind the seat of your truck. They fit conveniently right where you need them.

Spilltration® 16"x400yd Oil Shammy Roll

SPL044

Cut to fit your specific application. Pro Tip: To clean up sheen on larger bodies of water, deploy the shammy roll flat in a 'U' or 'S' pattern across the contained body of water. Utilize as a sweep and experience first hand the best sheen removal tool you've ever seen!

Fluid Absorbed Diesel, Kerosene, Hydraulic Fluid, Motor Oil and other Hydrocarbons

Shammy Dimensions 16" x 27" Diameter

Sold As Roll

Absorbency 121.9 Gal / Roll

Weight 33lbs.

per pallet 10 Rolls

Price \$442.00 / Roll

A large transformer oil spill threatened drinking water supplies in a local lake. Our crews were able to surround the spill with containment boom and clean up the bulk of the floating oil. For final polishing of the remaining sheen, we unrolled several thousand feet of Oil Shammy rolls inside the containment area. Within 12 hours the Oil Shammy materials cleaned up the final sheen. It's amazing.

–Spill Contractor

Spilltration® 10"x16" Oil Shammy Towels Pro Pack Dispenser Box

Dispenser boxes are great to have around your shop or tucked conveniently in a tool box on site. Use only what you need, and the remainder stays neatly stored for later.

OIL SPILLS BITE.
BITE BACK WITH

SPILLBOATM

The oil spill containment SpillBoa® “Sorbent Barrier on a Roll” is engineered for rapid containment and clean-up of oil and fuel spills.

Compared with traditional oil spill kits, the SpillBoa®:

- Takes up 75% less space and is readily storable in tight spots on emergency response vehicles.
- Weighs 80% less.
- Up to 40x faster to deploy.
- Flat profile puts more containment power in touch with the surface.
- Is strategically packaged in 4', 10', and 25' lengths.
- Polymer rope runs through each SpillBoa® for stringing across bodies of water.
- Heavy-duty nylon clips allow you to connect multiple sections.
- Saves big bucks by preventing oil spills from spreading into storm drains and waterways.

“As a spill-response professional, I’m always looking for ways to help our customers save time and money. As soon as we saw the SpillBoa barrier in action, we recommended it to all our clients to keep in their vehicles and equipment as a first line of defense. It deploys 40 times faster than traditional products and helps mitigate the impact of oil and fuel spills.”

*—Tim Acri, President,
Environmental Management Specialists*

Traditional oil spill boom (left) is overstuffed, rigid and does not absorb very well. SpillBoa rapid deployment boom lays flat on the surface and is very flexible. This allows the SpillBoa to deploy quicker and absorb oil and fuels faster.”

SMOOSH KIT PRODUCTS

Spilltration® Original SmooshKit Case

Our original ultra compact 6.8 gallon oil only spill kit.

Fluid Absorbed	<i>Diesel, Kerosene, Hydraulic Fluid, Motor Oil and other Hydrocarbons</i>
SmooshKit Dimensions	17" x 17" x 1.5"
Sold As	10 / Case
Absorbency	68 Gallons / Case
Absorbency Per	6.8 Gallons./ Each
Weight	33 lbs. / Case
# per pallet	16 Cases
Price	\$490.00 / Case

Kit Contents:

(5) 16x16 Husky Pads, (30) 16x16 Oil Shammy Towels, (1) Pair of Nitrile Gloves, (1) Disposal Bag

Three 5-gallon oil spill SmooshKits (left) take up 5x less space than three traditional 5-gallon oil-spill buckets.

The Smooshkit is a perfect fit for our smaller fleet vehicles. It fits perfectly behind a seat and can absorb a lot more oil compared to other products – 5 gallons of oil while only weighing 2 pounds. It also works well in wet conditions. The Smooshkit is a great step up from the outdated products that we previously used and helps us quickly mitigate any incident.

–Ron Dove, BGE

Price	\$245.00 / Case

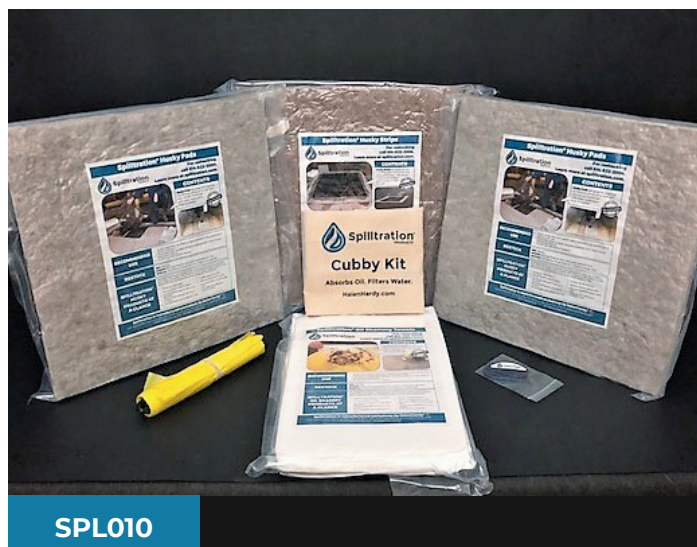

If your job calls for more than 5 gallons of absorbency but you don't have room for a large spill kit, then our Cubby Kits are for you.

The HalenHardy® Cubby Kit was named because it fits in the tightest nooks, crannies and cubbyholes. It's smoosh packed to fit in an area 80% smaller than a traditional 9-gallon spill duffel.

Spilltration® Emergency Cubby Kit 1.0

SPL010

Kit Contents:

(4) 8"x64" Husky Strips, (10) 16"x16" Husky Pads, (50) 10"x16" Oil Shammy Towels, (1) Pair of Nitrile Gloves, (1) Disposal Bag

Fluid Absorbed

Diesel, Kerosene, Hydraulic Fluid, Motor Oil and other Hydrocarbons

Cubby Kit Dimensions

18" x 18" x 5"

SPL038

Kit Contents:
(1) SpillBod®, (50) 10x16 Oil Shammy Towels, (2) Pair Nitrile Gloves,
(2) Disposal Bags

Punching well above Their Weight.

Spilltration®
BUCKKIT PRODUCTS

Spilltration® Emergency BuckKit 1.0 - 20 Gallon Overpack

Kit Contents:

(1) 20 Gal Lab Pack, (2) 5"x25' SpillBoa®, (2) 32"x48" Husky Rugs, (20) 16"x16" Husky Pads, (100) 10" x16" Shammy Towels, (3) Disposal Bags, (3) Pairs of Nitrile Gloves

Who says you can't cram 10 pounds of crap into a five-pound sack? We managed to "smoosh" 39.6 gallons of absorbency into a 20-gallon overpack. When you're done, the Lab Pack doubles as your DOT rated disposal container.

Fluid Absorbed	Diesel, Kerosene, Hydraulic Fluid, Motor Oil and other Hydrocarbons
Dimensions	24" Diameter x 24"
Sold as	1 / Kit
Absorbency	39.6 Gallons / Kit
Weight	41 lbs. / Kit
# per pallet	8 Kits
Price	\$445.00 / Kit

Spilltration® Emergency BuckKit 1.0 - 6.5 Gallon Screw Top Bucket

Prevent costly fines and remediation by quickly containing a spill regardless of the weather conditions. With our SpillBoa® and Husky Strips, you're armed with the easiest, fastest deploying material on the market. Surround the spill and gain back precious time needed for help to arrive.

Fluid Absorbed	Diesel, Kerosene, Hydraulic Fluid, Motor Oil and other Hydrocarbons

ROLL INTO ACTION.

Spilltration®
SPILLSTORM PRODUCTS

Spilltration® Emergency SpillStorm 1.0

SPL012 - \$895.00 / Kit

Weatherproof black box contains:
(13) 32"x48" Husky Rugs, (24) 8"x64" Husky Strips, (30)16"x16" Husky Pads, (500) 10"x16" Oil Shammy Towels, (5) Pairs of Nitrile Gloves, (9) disposal bags

Designed for land based spills. Quickly surround spills with Husky Strips. Line ditches, cover storm drains, and sop up your mess with Husky Rugs, and Pads. Use the Oil Shammy Towels for your final cleanup and sheen removal.

Weatherproof and compact, the rugged SpillStorm rolls into action and holds up to 125 gallons of "smooshed" Spilltration products. You can use one of our standard designs or we'll customize it to your specific application.

Fluid Absorbed	Dimensions	Sold as	Absorbency	Weight	# per pallet

Spilltration® 3" x 42" Wicking DamSock

SPL076

Finally, a sock that won't blow away in the wind. DamSocks are the heaviest socks on the market. Designed to dam and divert spills, in order to keep them from spreading into unwanted areas. The added weight allows them to press tightly against the ground, helping to contain the spill.

Fluid Absorbed Diesel, Kerosene, Hydraulic Fluid, Motor Oil, Gasoline and other Hydrocarbons

Dimensions 3" x 42" / Sock

Sold as 3 Socks / Case

Absorbency 1.5 Gallons / Case

Absorbency Per 64 fl. ozs. / Each

Weight 23 lbs. / Case

per pallet 36 Cases

Price \$45.00 / Case

Spilltration® 5.5" x 10' Hardy Filter Dike

Filter silt, sediment and oily runoff. Place around storm drains, in front of curb inlets and within small streams or ditches, in order to prevent debris, sediment and oily residue from reaching unwanted areas. The Hardy Filter Check will hold back silt and sediment, and filter oils and fuels out of water.

Hardy Filter Dikes and Husky Rugs successfully prevent sediment from running into trout stream.

SPL077

Fluid Absorbed Diesel, Kerosene, Hydraulic Fluid, Motor Oil and other Hydrocarbons - Filters Water

Dimensions 5.5" x 10' / Filter Dike

Sold as 3 Dikes / Bale

Absorbency 24.2 Gallon / Bale

Absorbency Per 8.1 Gallon / Each

Weight 17 lbs. / Bale

per pallet 12 Bales

Price \$131.00 / Bale

Spilltration® Husky Pan Case

SPL086

The only spill pan designed specifically for containing and cleaning up persistent leaks and drips in the outdoors. Very similar to our Polyback Husky material, the Husky pan has the added dimension of side walls. Slits in the base of the pan are large enough to allow clean water to flow out, while our Spilltration® fibers prevent oils or fuels from escaping. Husky Pad inserts help to prolong the life of the pan, while giving added absorption.

Fluid Absorbed Diesel, Kerosene, Hydraulic Fluid, Motor Oil and other Hydrocarbons - Filters Water

Husky Pan Dimensions 17" x 17" x 2"

Sold as 6 Pans / Case

Absorbency 15.7 Gallons / Case

Absorbency Per 2.6 Gallons / Each

Weight 11 lbs. / Case

per pallet 20 Cases

Price \$114.00 / Case

Spilltration® 3" x 10' Husky FlexSock

The only sock made to clean up oil and fuels in both wet and dry conditions. This flexible sock can wrap around irregular objects, helping to contain leaks and spills. Like the rest of our Spilltration Husky materials, it will absorb oils and fuels, while allowing clean rainwater to pass through.

Fluid Absorbed Diesel, Kerosene, Hydraulic Fluid, Motor Oil and other Hydrocarbons - Filters Water

Dimensions 3" x 10'

Sold as 12 Socks / Case

Absorbency 13.7 Gallons / Case

Absorbency Per 1.1 Gallons / Each

Weight 22 lbs. / Case

per pallet 24 Cases

Price \$258.00 / Case

SPL081

INSTANT UNDERFLOW DAMS

- Combines simplicity, space and speed.
- Used to block or dam streams, small rivers or ditches.
- Designed for spill response, water supply or as a temporary cofferdam to work in streams.
- Perfect for firefighters, petroleum companies, contractors, municipal workers, wildlife ecologist and mining exploration companies.

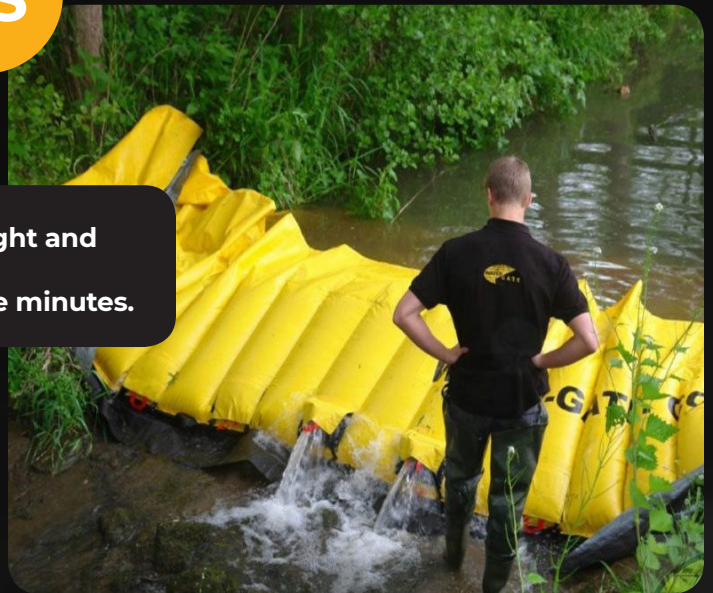

The Old Way

- It would take 980 sandbags to build the equivalent of our DAM2835
- 40 hours for 2 laborers to shovel the 30,000 lbs. of sand to fill 980 sandbags.

VS

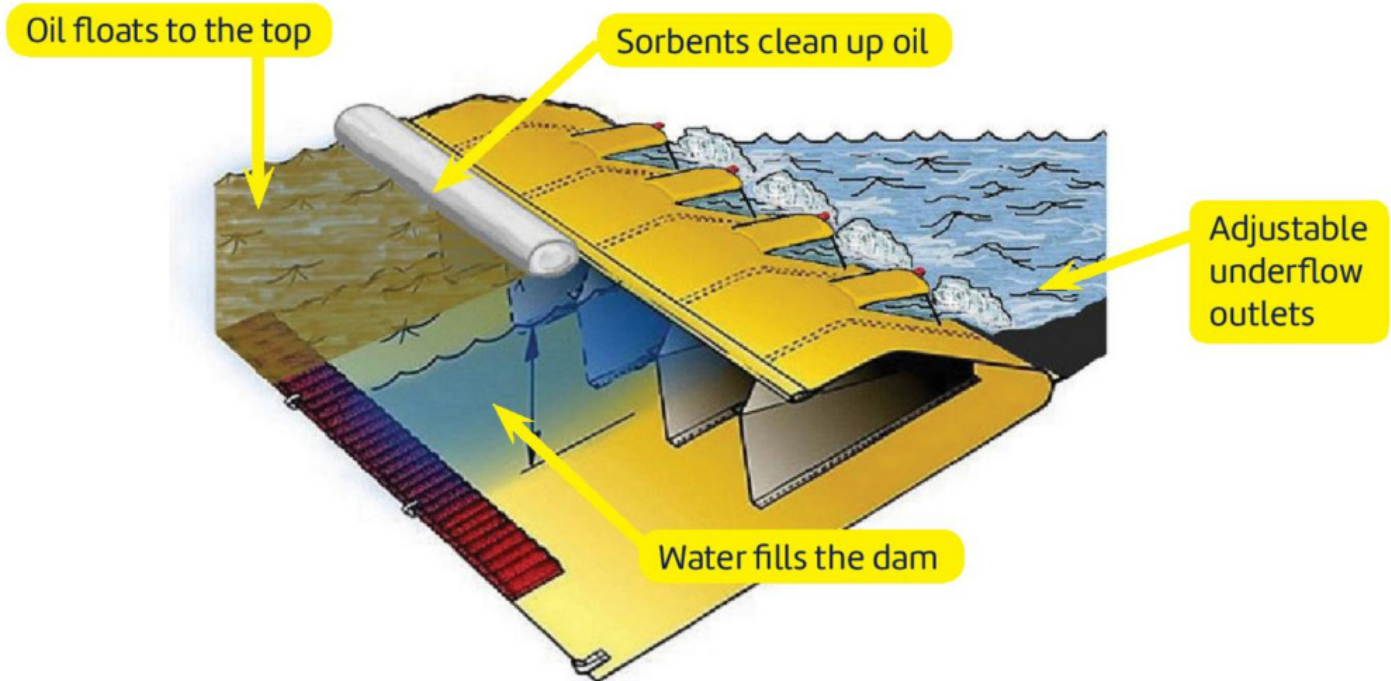

Our Way

- The Innovative delta wing design uses the weight and flow of the water to create an Underflow Dam
- Instant Dams can be deployed in as little as five minutes.

Light | Fast | Safe | Reusable | Cost Effective

How it Works

I wish I had these for the last 20 years. They really beat sand bags and PVC pipe and are so easy to deploy and recover.

—Patrick Crawford
North East Environmental Response

Acid Neutralizing

As battery technology develops and becomes a larger part of our infrastructure systems, battery acid spills and leaks are far more likely to occur.

Fortunately, we have developed a line of products that allow you to safely neutralize, clean up, and dispose of acids. All of our Acid Neutralizing products give you a visual color indication when the acid has been effectively neutralized. Confidence in knowing when an acid has been neutralized provides a safer process for workers, and eliminates the waste associated with over applying neutralizing product.

ACID NEUTRALIZING SOCKS AND PILLOWS		
Item #	Description	Price

07-010-121 | \$269.00 / Kit

Kit includes:
(4) 12" x 12" pillows, (8) socks 2" x 48" , (both socks and pillows will be bagged in a ziplock bag), (2) 2lb. shaker bottles, (2) disposal bags / reclosable zipties, (1) pair goggles, (1) apron, (1) pair nitrile gloves

Spill Containment Pallets

Containment Pallets are made in the USA from high-density polyethylene (HDPE).

Our pallets feature:

- Forklift pockets
- Removable grating for easy cleaning
- Modular design allowing multiple units to be easily connected together
- UV protection
- All pallets meet SPCC, EPA requirements for secondary spill containment of hazardous materials (40 CFR 264.175)

Item #	Description	Price
08-006-029	2 Drum Black Modular Platform w/Drain	\$220.00

08-006-031	Poly Pallet Ramp	\$345.00

Outdoor DrumShed

EcoPolyBlend™ DrumSheds™ feature a weather resistant, robust design made of eco-friendly 50% recycled polyethylene. Convenient roll top doors allow access from front or rear. Wide door opening of 52" accepts palletized loads. The leak proof pallet sump meets EPA and SPCC requirements and has removable, durable deck grating for easy clean up of spills. A spacious interior offers ample headroom for adding funnels or pumps. Safety features include grounding capability, integral anchor bolt locations for wind resistance, and molded in lugs which accept padlocks for security. Forklift pockets front and back make it easy to relocate empty sheds. Ships fully assembled.

Berms

HH-8640

Easily create custom containment around machinery or equipment that is permanently mounted or cannot easily be moved. Meets SPCC and EPA Container Storage Regulations (40 CFR 264.175)

- Component system provides flexibility to create a semi-permanent, high-visibility custom barrier.
- Durable, vinyl covering resists oils, coolants, and most chemicals.
- Cut to length and secure to floor with included sealant, then seal seams with the vinyl adhesive.
- Economical containment for leaks and spills around machinery and equipment - no need to build expensive cement or angle iron curbs.
- High-visibility yellow color draws attention to the barrier for increased safety.
- Easy removal requires only a flat-bladed shovel.

Kit Contents:

(2) 25' Berm Builder Walls, (4) Berm Builder Corners, (6) Floor Sealant Tubes, (1) 10-foot section Connector Collar, (1) 8oz. Industrial Vinyl Adhesive

Item #	Sold As	Price

Cool-Ox® Spill Kit - 5 Gallons

07-010-107 | \$270.00 / Kit

Works on:

Diesel, Lube Oil, Gasoline, Hydraulic Fluids, Pesticides, Solvents, Crude Oil, Chlorinated Solvents, Condensate, Herbicides, Motor Oil

The Cool-Ox® process is a hydrogen peroxide based technology designed to address a wide variety of remediation challenges presented by organic contaminants in various types of soils (especially clay) and groundwater. Although other hydrogen peroxide technologies may sound similar, only Cool-Ox® is based on a unique chemistry that truly delivers results.

Cool-Ox® is the most successful technology for eradicating hydrocarbon contamination in the petroleum industry today. If you spill it – you can kill it! You can immediately treat hydrocarbon spills and eliminate the problems of odors, soil staining, and leaching or runoff potential

1. Break up contaminated soil with a shovel, rake, etc.
2. Open Spill Kit bucket and remove contents.
3. Empty contents of one bag of Cool-Ox® Liquid Oxidizer into Spill Kit bucket.
4. Stir one bag of Cool-Ox® Activator Solids into liquid Cool-Ox® in bucket with stir stick until all solids are suspended.
5. Replace bucket lid snugly.
6. Pop up spout and thoroughly mix Cool-Ox® into contaminated soil.
7. If more Cool-Ox® is required, repeat steps 3 through 6 with second set of Cool-Ox® products.

Drain Covers

Quickly and easily prevent spills, sediment, or other contaminants from entering a storm drain. Our polyurethane covers quickly create a tough, durable seal using either side. Chemically resistant polyurethane is compatible for use with a wider range of chemicals than rubber and plastics.

Item #	Description	Price
08-004-010	Drain Protector II - 36" Square	\$365.00
08-004-024	Drain Protector II - 20" Round	\$114.00

08-004-006	Drain Protector II - 36"x60" Rectangle	\$585.00

Micro-Blaze® Emergency Liquid Spill Kit 5 Gallon

07-010-087

Micro-Blaze Emergency Liquid Spill Control is a safe, non-toxic, microbial formulation that comes in an easy-to-use concentrated liquid. Simply dilute with water down to the recommended percentage (typically 3% to 6%) and apply the diluted solution.

It breaks down, degrades, and digests organic waste while also controlling vapors and eliminating flammability. Any unused concentrate will maintain its approximate 10-year shelf-life. The residue and run-off after applying the diluted solution can be safely sent to industrial and municipal waste water treatment plants.

The numerous strains of microbes in Micro-Blaze Emergency Liquid Spill Control create a synergistic blend for the degradation of hydrocarbons, pollutants, and other organic wastes. All of our microbes are naturally occurring, not genetically engineered, and are found in soils and waters all over the earth. These microbes have been carefully researched, tested, and chosen for their affinity to degrade hydrocarbons and organics and, together with a proprietary blend of wetting agents and nutrients, create an ideal and easy to use formulation for treatment of various organic contamination.

Universal and Oil Only Meltblown Polypropylene Absorbents

Gray Universal and White Oil Only dimpled meltblown polypropylene sorbents are single-layer, economical sorbents. We pass this media through our thermal bonder, which ties down loose fibers. Dimpled sorbents are also perforated to minimize waste.

- Dimpled for fast wicking
- Perforated, so you use only what you need
- Highly absorbent
- Available in both Rolls and Pads

UNIVERSAL ABSORBENT PADS

Hardy Wipes Case

HardyWipe wet towels are engineered to clean all kinds of grease, tar, oil, paint and ink. Clean your grimy tools, sticky gloves, and greasy parts. The best part is that the wet towel orange peel formula is safe and gentle on the skin.

Item #	Sold As	Price
WIP001	(6) Canisters / Case	\$98.00 / Case

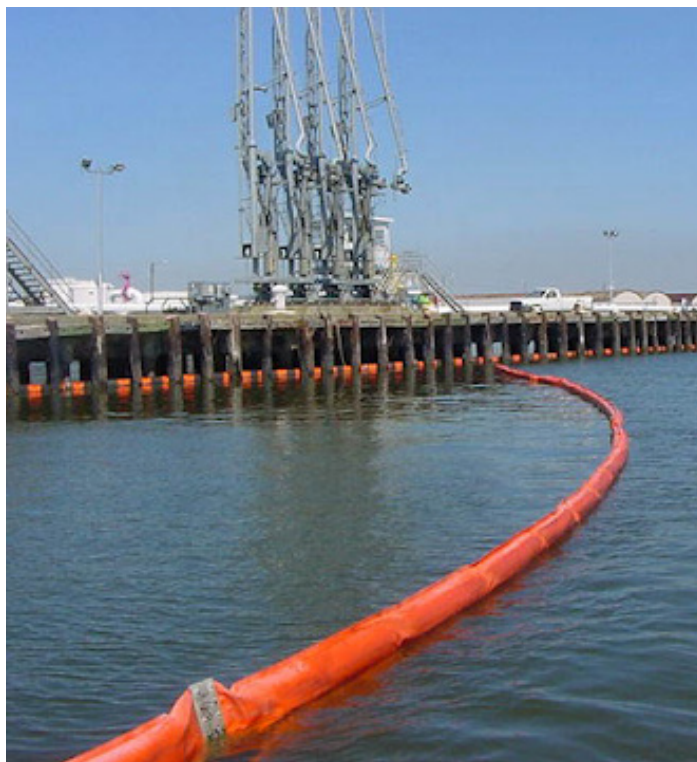

HardyHolder

The HardyHolder Magnetic Holster was a necessity for mobile outdoor service companies. They loved the wipes but needed something to keep the canisters from rolling around their trucks, falling off of bumpers, and staying still when they yanked a wipe for use.

Item #	Sold As	Price
WIP002	(2) per Pack	\$25.00 / Pack
