Too many fields on the screen? user-defined fields are too far and interfere the natural workflow?

Not anymore!

SAP Business One provides you with a user interface configuration tool which allows to customize the user interface of the application forms. You can hide fields and tabs, move fields from one area to another, and even bring user-defined fields into the core areas of a given form.

The screenshot shows the 'Business Partner Master Data - UI Edit Mode' window. It features a grid of tabs: 'General', 'Payment Terms', 'Payment Run', 'Accounting', and 'Remarks'. The 'General' tab is active, displaying various fields such as 'Code', 'Name', 'Group', 'Currency', 'Federal Tax ID', 'BP Currency', 'Orders Opportunities', 'VIP', 'Tel 1', 'Tel 2', 'Mobile Phone', 'Fax', 'E-Mail', 'Web Site', 'Shipping Type', 'BP Project', 'Industry', 'Business Partner Type', 'Territory Language', and 'Alias Name'. A red rectangular box highlights the 'VIP' dropdown menu, which is currently set to 'VIP'. At the bottom left, there are radio buttons for 'Active', 'Inactive', and 'Advanced'. At the bottom right, there is a checkbox for 'Block Sending Marketing Content' and a 'You Can Also' button.

You can save your design in dedicated templates and apply as relevant.

For more information refer to the how-to guide [How To Work With Configurable UI Templates in SAP Business One 9.1](#).

Available as of SAP Business One 9.1, version for SAP HANA and SAP Business One 9.1.

drawback, and will be great if you can add support for resizing.

Hi Parvin

Thanks for raising your feedback, you can find detailed instructions how to use the new functionality in "How To Work With Configurable UI Templates" document available in customer and partner portals.
