Doing business around the world? Receiving orders and buying goods from multiple countries?

SAP Business One enables you to enter translations for various values, display, and print the respective documents in multiple languages, based on your translation!

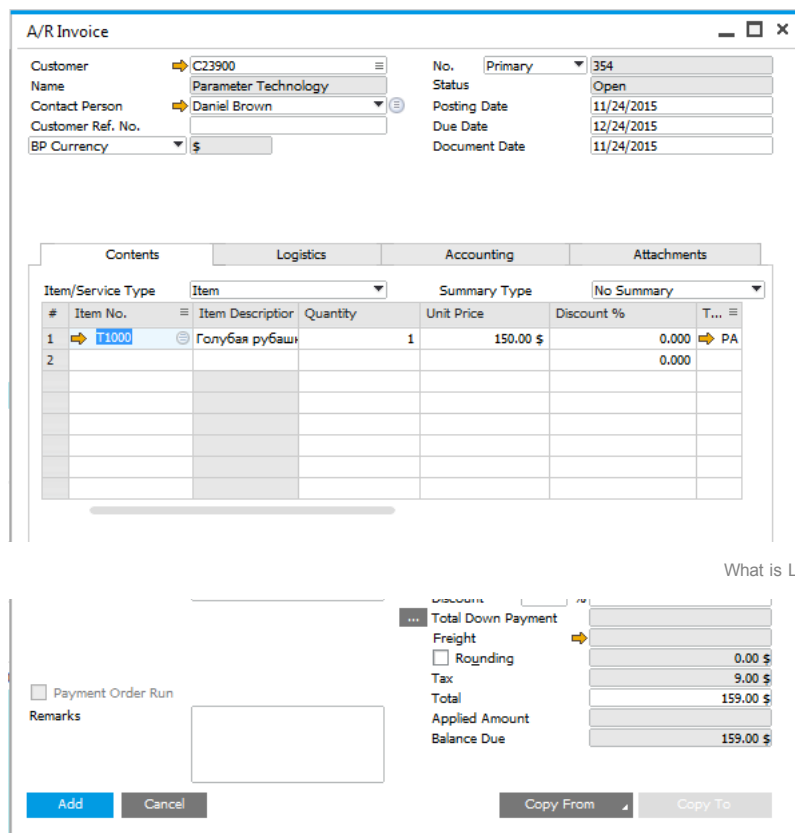

Select the Multi-Language Support checkbox:

The screenshot shows the 'Company Details' window in SAP Business One, specifically the 'Basic Initialization' tab. The 'Multi-Language Support' checkbox is checked and highlighted with a purple box. Other settings visible include 'Chart of Accounts Template' set to 'US_CoA', 'Local Currency' and 'System Currency' set to 'US Dollar', and 'Default Account Currency' set to 'All Currencies'. Other checked options include 'Display Credit Balance with Negative Sign', 'Use Segmentation Accounts', 'Use Perpetual Inventory', and 'Manage Item Cost per Warehouse'. The 'Item Groups Valuation Method' is set to 'Moving Average'.

An indicator is added to all translatable values. Enter the translations for the relevant values in the required languages:

Apply the relevant language to each business partner. When displaying a document for a given business partner, choose: View > Translated Values. The translated values are displayed in the language assigned to the business partner:

Available in SAP Business One, version for SAP HANA and SAP Business One.
