If you are managing inventory across multiple warehouses you know how important it is to be able to keep track on items and quantities to the level of the single item. To make your inventory even better organized, SAP Business One provides you with Inventory Transfer Request. An internal document that allows you to record the need in inventory transfer without posting an inventory transaction. It updates the 'Ordered' and 'Available' quantity in the target warehouse (the same as sales order, production order and reserve invoice) and the respective accumulators in the source warehouse.

Remarks

The Inventory Transfer Request is available under Inventory > Inventory Transactions and can be generated also from within Sales Order, A/R Reserve Invoice, and Production Order. In addition, in certain scenarios, the MRP wizard may recommend creating an inventory transfer request.

Available since SAP Business One 8.82.

This tip and all the other tips are available on the [Tip of the week SCN page](#).

Do you recommend using the inventory transfer request when a technician's mobile stock levels are running low? Also, in what circumstances do you recommend managing mobile stock at the

warehouse level vs. the bin level?

Hi Greg

It is possible, but it depends on the nature of the business and will need to take into account a wide range of details.

Rgd... [See more](#)
