The System Landscape Directory (SLD) introduces a new service allowing you to manage the alert settings on the server side and send alerts without logging on to SAP Business One client. With the Job Service, these tasks can be performed via a Web browser.

The screenshot shows the 'SAP Business One Job Service' configuration page. It includes a 'Job Service Configuration' header, tabs for 'Mail Settings' and 'Alert Settings', and a 'Database Server' section with a table of 'Company Databases'.

SAP Business One User | | **Status** | ● RUNNING | [Stop](#)

[Save](#)

Database Server | | [Save](#) | [Refresh](#)

Company Databases			
Company Name	Database Name	Localization	Version
<input type="checkbox"/> OEC Computers Deutschland	SBODEMODE	DE	920001
<input checked="" type="checkbox"/> OEC Computers UK	SBODEMOGB	GB	920001

The new service includes a pre-defined technical user that enables you to send internal messages or trigger SAP Business One Mailer to send E-mails.

Available since SAP Business One 9.2, version for SAP HANA and SAP Business One 9.2 .

This tip and all the other tips are available on the [Tip of the week SCN page](#).
