In business as in life, everything is connected. Every item, customer, warehouse or invoice are connected to many other pieces – not all of them stand out in the given window. SAP Business One brings this context closer to you. In each and every window you can open the context menu, or the “Go To” menu from the menu bar, and find only the relevant options related to the displayed record.

For example if you open the context menu while looking at certain item you can tell within one click what alternative items this item has, generate the Inventory Audit Report for that item only, create purchase request for the given item and much more.

Available in SAP Business One, version for SAP HANA and SAP Business One. This tip and all the other tips are available on the [Tip of the week SCN page](#). You can also visit the [Implementation Arena](#) for useful implementation tips.

Relationship Map é o meu item preferido. No início, os usuários precisam de uma ajuda para entender o relacionamento e workflow dos documentos antes de executar as tarefas no ERP.
