What's New?

Spotlight on Product: Solver BI360 - Business Intelligence Suite

Love MS Excel? Move Beyond Static SAP Business One Reporting and Planning!

The BI360 solution solves business problems and offers economic value to organizations relative to reporting and analytics (financial and operational), budgeting and forecasting - for all of your SAP Business One data, as well as any other data that may be stored independently across the enterprise.

If you have an affinity for MS Excel, and are looking for alternative reporting tools, want to eliminate the issues with redundant exports of data to Excel, and still use Excel for budget/forecast processes and would love to continue to do but in an automated capacity, then consider BI360 from Solver.

Solver BI360 - Business Intelligence Suite

BI360 provides a complete Excel and web-based suite with mobile apps, comprised of Reporting, Budgeting, Dashboard modules and a pre-configured Data Warehouse. Solver's BI360 Suite is the most complete Business Intelligence (BI) solution of its kind, and it is available for both on-premise and cloud-based deployment.

REPORTING

- Microsoft Excel- and Web-based with mobile apps
- Live Financial Reporting (GL), Operational Reporting (Sub-ledgers – AP, AR, etc.) as well as Benchmark, KPI and graphical reporting
- Ad-hoc reporting and analysis
- Multi-company/Multi-currency consolidations
- Drill down to GL detail and drill across to sub-ledgers and document images
- On-Demand and Auto-Scheduled reporting and distribution
- Microsoft Excel- and Web-based budget and forecast input
- Streamlined data entry
 - Pre-built as well as user-defined input templates
 - Copy history and make changes in a single click
 - Spread budgets evenly or based on trends or budget at line item level
 - Include comments (account or line item level)
- Forecasting (single or multi-year)
- Modeling and what-if analysis
- Budget data immediately available for reporting and dashboards
- Drag & Drop report design that any business user can learn
- Integration tool connects BI360 Reporting 'live' to custom tables or other sources
- Report Library and Document Management: Locate and analyze reports and related activities
- Security integrates with Active Directory

PLANNING

- Microsoft Excel- and Web-based budget and forecast input
- Streamlined data entry
 - Pre-built as well as user-defined input templates
 - Copy history and make changes in a single click
 - Spread budgets evenly or based on trends or budget at line item level
 - Include comments (account or line item level)
- Forecasting (single or multi-year)
- Modeling and what-if analysis
- Budget data immediately available for reporting and dashboards

DASHBOARDS

- Web-based for anywhere, anytime access
- Works with SharePoint (but not required)
- Fully customizable dashboard layouts
- Interactive charts, reports and more
- Drag & Drop dashboard design for easy development of new dashboards
- Business users learn dashboard design in hours, not days
- Run real-time on ERP system or on the BI360 Data Warehouse with drill-down
- Detailed security

DATA WAREHOUSE

- Preconfigured Data Warehouse that can be set-up in days, not months
 - Dramatically reduces time/cost/risk to implement
 - Preconfigured modules (GL, AR, AP, Rev, Assets, HR, Project) and 50 additional 'user defined' modules for any other pertinent data
- Integrate to virtually any data source including cloud
- User friendly 'Office-like' administrative interface built for business users
- Advanced business rules such as Currency, Elimination, Allocations, KPIs, etc.
- True multi-source data warehousing to support Dashboards, Reporting and Planning
- Microsoft SQL Server-based
- Pre-integrated with BI360 Reporting, Planning and Dashboard modules, and also works with any other BI tool that supports MS SQL Server, such as PowerPivot, Power BI, Tableau, Qlikview, etc.
