

Software Engineer

Want to have a global impact in your work? Join our fast moving team! We're making it easy for manufacturers to choose safer chemicals when designing products, and reshaping management of complex global supply chains.

Toxnot is a growing software-as-a-service startup based in Fort Collins, CO. We're looking for software engineers to scale a cloud service to serve the global supply chain.

Think massive data structures, machine learning, responsive UI across devices, complex analytics. But above all, a reliable, efficient cloud service that's used globally 24x7.

We're looking for Software Engineers with background in Computer Science and Web Development, and passion for shipping software.

Job responsibilities include:

- Design and spec new features
- Implement web app UI
- Automate testing of new features
- Monitor, service, and scale a production cloud service
- Work with customers to streamline product features

Preferred experience:

- Data Structures and Algorithms
- Web Development
- Cloud Services
- HTML 5
- JavaScript
- jQuery
- Bootstrap
- C#

toxnot PBC is an EEO/AA employer. toxnot is an inclusive employer that believes in workplace equality, supports diversity, creates a welcoming environment, and respects the unique qualities each individual brings to the company.
