What makes us different?

We are Clinician Led

We provide managed service solutions through seasoned, knowledgeable advice, combined with leading-edge IT-driven solutions.

We are Innovative

We think outside of the box to help customers redesign and implement bespoke primary care services.

We are Part of Something Bigger

We are part of the Cegedim Group, offering complete integrated digital solutions and across the wider healthcare setting.

We have a wealth of Experience

Over 50 years of combined experience and expertise in using technology in healthcare go into delivering our bespoke service solutions.

We care about what we do

We are passionate about what we do. We believe in delivering not only the best value to you, but also the best solution for improving patient wellbeing and outcomes.

PrimaryCare

powered by CegeDIM Rx

We are a leading clinician led healthcare consulting and IT services group

Our focus is to provide managed service solutions through seasoned, knowledgeable advice, combined with leading edge IT-driven solutions and a hands-on, operational presence.

We help our customers redesign, implement and manage the operation of primary care services. We have a recognised specialisation in pharmacy services, but our customers now stretch across the primary care spectrum and our experience includes medicines management,

optometry and general practice. We support the NHS and service providers to deliver the outcomes that matter, whatever their setting, and regardless of their service commissioning need.

For over a decade we have helped NHS Service Leads in Primary Care Trusts to manage, evaluate and improve the delivery of local NHS services.

We are present in over 40 former PCT areas and each month, our expert team processes an average 130,450 consultations for a range of

of locally commissioned services including:

- Pharmacy Services
- Stop Smoking Services
- Optometry – glaucoma referral
- Optometry – cataract referral
- Drug & Alcohol Services

Consulting Services

Together, our clinician-led team has over 50 years' experience in pharmacy and healthcare. We apply this experience through our Consulting Services business to help customers manage projects, understand policy, implement change and deliver outcomes that matter.

Clinical Commissioning Groups

Clinical Commissioning Groups (CCGs) take statutory responsibility for commissioning local NHS services and commissioning the great majority of NHS services for patients, including:

- In community pharmacy, the Minor Ailments Service (MAS), and
- Local optometry services

In an era of continuing financial austerity, it will be crucial to ensure that any investment in service commissioning is planned and executed in a managed way.

Our Consulting Services can help you achieve the results that matter to your CCG, the NHS and patients.

Our **Service Pact** service administration software can also help you enhance service efficiency, enabling you and your service providers to focus on service delivery.

Optometry Services Commissioners

Clinical Commissioning Groups face immense pressure to maintain cost-effective service delivery whilst also manage data collection, auditing or reporting for new locally commissioned services.

Robust audit data is vital to convince budget-holders of the value of locally commissioned services to improve patient health at a local level.

Unfortunately, the administration involved in providing local optometry services can be so time consuming that many providers are discouraged from participating.

By moving to a web-based solution like **OptoManager** scarce clinical resources are freed up so commissioners and providers can focus their attention on delivering efficient services and excellent patient outcomes.

Health & Wellbeing Boards

Improving and promoting good health, preventing ill health, and tackling health inequalities are immense challenges that have faced NHS Service Commissioners for decades.

Today, the challenge is made harder still by budgetary cuts and increasing demand for services by an ageing population. With the abolition of PCTs in 2013, that is exactly the challenge facing Local Authorities.

We offer a suite of **Consulting Services** to help Health and Wellbeing Boards manage the transition to become the gate-keeper of public health.

With over a decade of experience in delivering sustainable and cost effective local enhanced services, we also have the technology and management services to help you achieve excellence in NHS service delivery.
