

ARBUTUS ANALYZER FOCUS ON FUNCTIONS TRAINING

LEARNING OBJECTIVES

Become a more powerful Analyzer user, increase the scope of your analytics and ensure that you can achieve your analytic goals more efficiently and effectively by incorporating functions. This course combines real world examples with hands-on practice activities. Key topics include:

- Harmonize data for better matching and results
- Select data by isolating segments from a record or field
- Convert data from one type to another
- Use date and time data to identify weekend transactions and build flexible date ranges into your analysis
- Clarify the meaning of your data by replacing, inserting, including or excluding characters
- Supercharge your keyword searches using SmartSearch, Listfind and other functions
- Identify duplicates in inconsistent data (fuzzy comparisons)

METHODOLOGY

This is a group live, instructor-led course. This one-day course is designed to familiarize you with the most commonly used Analyzer functions.

REGISTRATION

To register, contact us at training@arbutussoftware.com or 1.877.333.6336 ext. 332
