COVID-19 Safety Posters

Share facts about COVID-19

Know the facts about coronavirus (COVID-19) and help stop the spread of rumors.

FACT 1 Diseases can make anyone sick, regardless of their race or ethnicity.

Fear and anxiety about COVID-19 can cause people to yell or reject others even though they are not at risk for spreading the virus.

FACT 2 For most people, the immune system successfully fights off the virus that causes COVID-19, which is thought to be low.

Older adults and people of any age who have serious underlying medical conditions may be at higher risk for more serious complications from COVID-19.

FACT 3 Someone who has completed quarantine or has been released from isolation does not pose a risk of infection to other people.

For up-to-date information, visit CDC's coronavirus disease 2019 web page.

FACT 4 There are simple things you can do to help keep yourself and others healthy.

- Wash your hands often with soap and water for at least 20 seconds, especially after blowing your nose, coughing or sneezing, going to the bathroom, and before eating or preparing food.
- When in public, wear a cloth face covering that covers your mouth and nose.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.

FACT 5 You can help stop COVID-19 by knowing the signs and symptoms, which can include:

- Fever
- Cough
- Shortness of breath

Seek medical attention immediately if you or someone you love has emergency warning signs, including:

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion or not able to be woken
- Bluish lips or face

This list is not all inclusive. Please consult your medical provider for any other symptoms that are severe or concerning.

What You Can Do if You are at Higher Risk of Severe Illness from COVID-19

Are You at Higher Risk for Severe Illness?

Based on what we know now, those at high-risk for severe illness from COVID-19 are:

- People age 65 years and older
- People who live in long-term care or have frailty
- People at all ages with underlying medical conditions, particularly if not well controlled, including:
 - People with chronic heart disease or conditions related to some asthma
 - People who have serious heart conditions
 - People who are immunocompromised
 - Many conditions cause a person to be immunocompromised, including cancer treatment, steroids, liver disease or organ transplants, immune deficiency, long-term corticosteroid use, HIV or AIDS, and medications for diabetes, blood thinners and other chronic medical conditions.
 - People with serious obesity (body mass index [BMI] of 40 or higher)
 - People with diabetes
 - People with chronic kidney disease undergoing dialysis
 - People with sickle cell disease

Here's What You Can do to Help Protect Yourself

- Stay home if possible.
- Wash your hands often.
- Avoid close contact (6 feet, which is about two arm lengths) with people who are sick.
- Clean and disinfect frequently touched surfaces.
- Avoid all cruise travel and non-essential air travel.

Call your healthcare professional if you are sick.

For more information on steps you can take to protect yourself, see CDC's [How to Protect Yourself](#).

[cdc.gov/coronavirus](https://www.cdc.gov/coronavirus)

What you should know about COVID-19 to protect yourself and others

Know about COVID-19

- Coronavirus (COVID-19) is an illness caused by a virus that can spread from person to person.
- The virus that causes COVID-19 is a new coronavirus that has spread throughout the world.
- COVID-19 symptoms can range from mild (such as symptoms of a common cold) to severe illness.

Know how COVID-19 is spread

- You can become infected by coming into close contact (about 6 feet or two arm lengths) with a person who has COVID-19. COVID-19 is primarily spread from person to person.
- You can become infected from respiratory droplets when an infected person coughs, sneezes, or talks.
- You may also be able to get it by touching a surface or object that has the virus on it, and then by touching your mouth, nose, or eyes.

Protect yourself and others from COVID-19

- There is currently no vaccine to protect against COVID-19. The best way to protect yourself is to avoid being exposed to the virus that causes COVID-19.
- Stay home as much as possible and avoid close contact with others.
- Wear a cloth face covering that covers your nose and mouth in public settings.
- Clean and disinfect frequently touched surfaces.
- Wash your hands often with soap and water for at least 20 seconds, or use an alcohol-based hand sanitizer that contains at least 60% alcohol.

Practise social distancing

- Buy groceries and medical care, go to the doctor, and complete banking activities online when possible.
- If you must go in person, stay at least 6 feet away from others and do not touch them.
- Get groceries and medical care by mail or delivery when possible.

Prevent the spread of COVID-19 if you are sick

- Stay home if you are sick, except to get medical care.
- Avoid public transportation, ride-sharing, or taxis.
- Separate yourself from other people and pets in your home.
- There is no specific treatment for COVID-19, but you can seek medical care to help relieve your symptoms.
- If you need medical attention, call ahead.

Know your risk for severe illness

- Everyone is at risk of getting COVID-19.
- Older adults and people of any age who have serious underlying medical conditions may be at higher risk for more serious illness.

How to Protect Yourself and Others

Cover your mouth and nose with a cloth face cover when around others

- You could spread COVID-19 to others even if you do not feel sick.
- Everyone should wear a cloth face cover when they have to go out in public, for example to the grocery store or to pick up other necessities.
 - Cloth face coverings should not be placed on young children under age 2, anyone who has trouble breathing, who is unconscious, incapacitated or otherwise unable to remove the mask without assistance.
 - The cloth face cover is meant to protect other people in case you are infected.
 - Do NOT use a Band-Aid mask for a health care worker.
 - Continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing.

Cover coughs and sneezes

- If you are in a private setting and do not have on your cloth face covering, remember to always cover your mouth and nose with a tissue when you cough or sneeze or use the inside of your elbow.
- Throw used tissues in the trash.
- Immediately wash your hands with soap and water for at least 20 seconds. If soap and water are not readily available, clean your hands with a hand sanitizer that contains at least 60% alcohol.

Clean and disinfect

- Clean AND disinfect frequently touched surfaces daily. This includes tables, door knobs, light switches, counter tops, handles, desks, phones, keyboards, toilets, faucets, and sinks. Visit www.cdc.gov/coronavirus/2019-ncov/homepage-getting-into-disinfecting-surface.html.
- If surfaces are a dirty, clean them: Use detergent or soap and water prior to disinfection.

[cdc.gov/coronavirus](https://www.cdc.gov/coronavirus)

Prevent the spread of COVID-19 if you are sick

Remember to wear a mask (or use a cloth face cover) if you are sick with COVID-19.

Stay home and get medical care if needed

- Stay home as much as possible and avoid close contact with others.
- Wash your hands often with soap and water for at least 20 seconds, or use an alcohol-based hand sanitizer that contains at least 60% alcohol.
- Wear a cloth face covering that covers your nose and mouth in public settings.
- Clean and disinfect frequently touched surfaces.
- Wash your hands often with soap and water for at least 20 seconds, or use an alcohol-based hand sanitizer that contains at least 60% alcohol.

Separate yourself from other people as much as possible

- Do not go to work, school, or public places.
- Do not visit family or friends.
- Do not go to school, work, or public places.
- Do not visit family or friends.
- Do not go to school, work, or public places.
- Do not visit family or friends.

Monitor your symptoms

- Get your symptoms monitored by a healthcare professional.
- Get your symptoms monitored by a healthcare professional.
