

Power BI Launchpad

Automated data preparation
and dashboard delivery
using personalised insights

Are you:

- Needing to introduce personalised business intelligence?
- Suffering from hampered performance due to your current reporting solution?
- Failing to maximise the value of your existing Power BI purchase with Office (Microsoft) 365?

Businesses are generating more data than ever, but many of the key decision makers are still relying on extracts to spreadsheets to make their decisions. This creates a cottage industry of data preparation, with disconnected, ungoverned spreadsheets resulting in delays in making decisions and a lack of trust in the data. We work with customers to use Power BI to automate data preparation and dashboard delivery using personalised insights. This enables users to standardise and re-use reporting on common data sources across the business improving data quality, resulting in faster and more reliable decision making.

Coeo's Approach

Project Initiation Workshop

- Define requirements and success criteria for the pilot

Architecture & Discovery Workshop

- Review current architecture landscape
- Analyse data source and data set in scope for the pilot
- Analyse/review/define reports in scope for the pilot
- Security
- Licensing
- Capacity planning

Development & Setup

- Data model
- Reports
- Provisioning/Configuration of Power BI
- Demonstration, Training & Handover

Demonstration & handover

Key benefits

The Jumpstart will:

- Provide a solid architecture that meets your business needs – “right first time”
- Include a pilot solution ready for production and expansion, rather than a throwaway Proof-of-Concept
- Ensure extensive knowledge transfer to your team including two days of formal training for up to 10 people

Deliverables

Architecture & Discovery report

A complete end-to-end solution, including:

- Data model (up to two data sources)
- Power BI reports (up to three reports with up to three pages per report)
- Power BI tenant provisioned/configured
- Install and configure Power BI Gateway

Roadmap for future enhancements and production deployment with support

Demonstration and handover of pilot

Why Coeo?

Coeo is Europe's number one data platform specialist. Our consultants work with the latest Microsoft technologies every day and bring this experience to each customer engagement, working with you to understand your business, your processes and your needs and providing recommendations specifically tailored to your environment.
