

TestWise – finding xml test data files

To help find certain issues, we often ask for "test data files".

These are the files which TestWise saves and can only be opened by TestWise, they are not the PDF test reports.

You can find the "test data files", which have the extension **.xml**, and you can find them in several ways:

1. From the TestWise Welcome screen, click the Open button and navigate to where TestWise saves test data files ...

File name: Test Files (*.xml)

Open Cancel

Navigate to the folder where test data files are saved

Right-click on file or selection of files

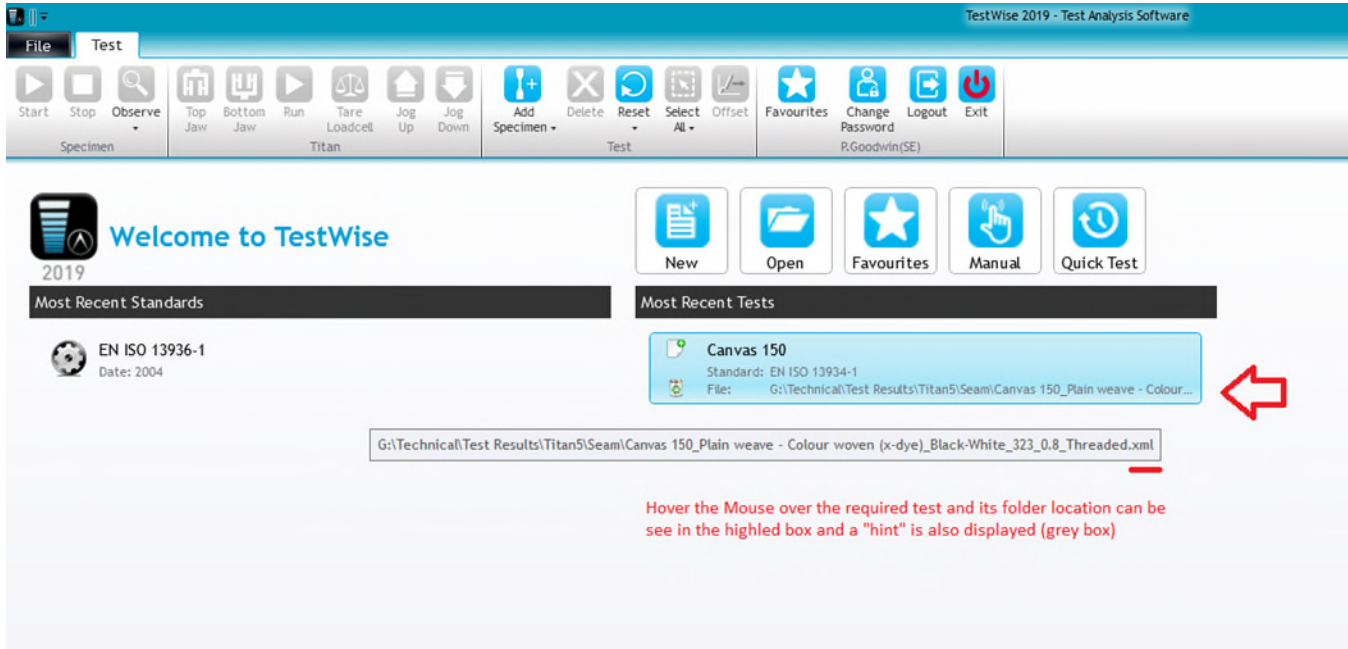

Then chose "Send To"

Then chose "Compressed (zipped) folder"

Copy the zip folder and email back to us
