Churches Can Deliver More on their Mission with Modern Financial Management Software

FAST GROWTH REQUIRES MORE EFFICIENT PROCESSES

As churches grow, managing financial processes, like expense reconciliations and allocations, becomes too complex to be handled through spreadsheets. Pastors and church leaders need clear, current information. Getting visibility across multiple campuses and ministries as well as tracking different sources of revenue as churches diversify can no longer be a manual process.

ACCOUNTING SOFTWARE DESIGNED TO SUPPORT YOUR MINISTRY

Sage Intacct provides the powerful and accessible tools needed to get your organization running seamlessly. Cloud sharing improves communication, teamwork, and accountability across facilities, ministries, and operations. Shared data allows you to manage everything from fund tracking to purchase requisitions to credit card expense management in real time from the local level upwards.

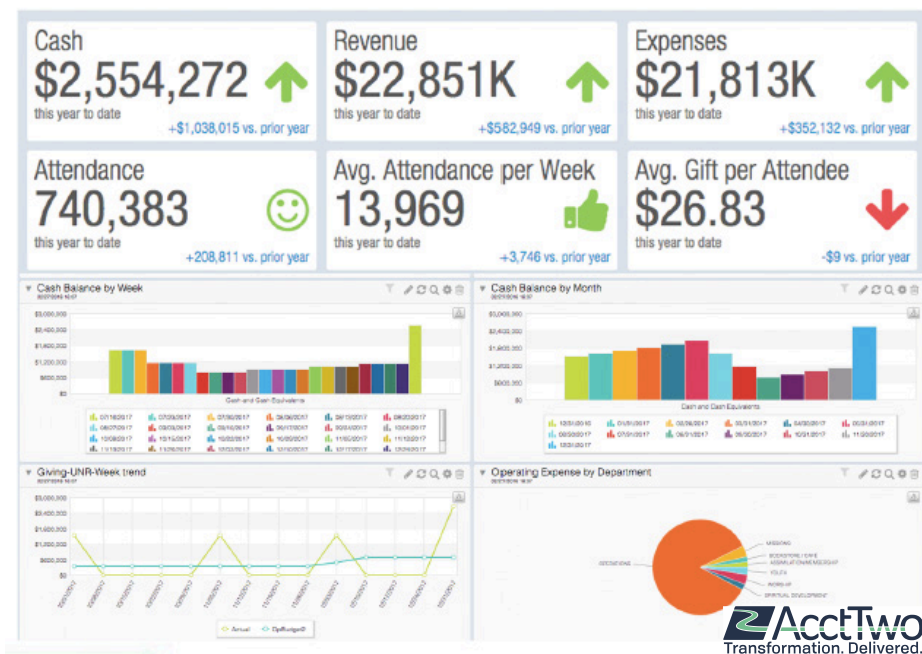

“With Sage Intacct our users can click on the data and see the origin. If they need to ask a specific question about a charge, they can go ahead and look into that charge and **drill down all the way to the supporting documentation**,” Libni Rodriguez Director of Project Management, Gateway Church.

OUR COMMITMENT

Leaders have better control when they can spend time analyzing information instead of simply trying to process transactions and manage the daily aspects of the accounting department.

To help you achieve that goal, *our commitment to you is:*

- To truly understand the needs of your organization and your people
- To ensure that the finance and accounting component of your organization adds strategic value to your mission
- To provide you with best-practices and the experience of more than 100 Sage Intacct implementations for faith-based organizations
- To provide you with relevant data so that you can make the best decisions that will propel your mission forward
