

# Swiss Manufacturer uses Wiretap to Increase Secure Collaboration During and After Merger

## CUSTOMER OPPORTUNITY

Headquartered in Zurich, dormakaba Group is a global leader in access and security solutions. It serves as a single source for products, solutions and services related to doors and secure access to buildings and rooms for customers in over 130 countries. The company is the product of a merger of two highly established brands, Dorma and Kaba. It employs approximately 16,000 worldwide.

## CHALLENGE

When Dorma Group of Switzerland and Kaba Group of Germany planned to merge, they were interested in a social enterprise solution that would facilitate secure internal communication and allow them to gain greater efficiencies from increased collaboration.

The company was evaluating Yammer®, and at the same time, searching for a tool that would both increase security over confidential information and provide more control over internal compliance with policies, such as insider trading and sexual harassment.

## SOLUTION

In a Google search, the company discovered U.S.-based Wiretap — a powerful security platform for social networks that had been proven to close the security gaps in Yammer. Additionally, the platform allows companies to create custom policies and automatically monitor compliance. With strong support from management, and the formal launch of the new company looming, Yammer with Wiretap was deployed.

Wiretap bolsters compliance programs by deploying custom automated policies throughout the enterprise social network.

## RESULTS

dormakaba views its implementation of Yammer with Wiretap as an ROI win. It was impressed that, among other things, the solution kept new logo art files and other confidential information private up to the formal release date, despite various staff members having access to it. As icing on the cake, the company's new global intranet received a 2016 Best Intranet Design Award from Nielsen Norman Group, and its user adoption rate has been high.

**WIRETAP ENABLED** successful Yammer deployment

**CONFIDENTIAL** data kept safe and secure

**MERGER INFORMATION** remained private up to public announcement

**USER ADOPTION** increased

**IMPLEMENTATION OF WIRETAP** was an ROI win

The solution kept new logo art files & other **confidential information private** up to the formal release date.

## ABOUT WIRETAP

Wiretap empowers organizations to safely grow their Enterprise Social Networks and collaboration tools such as Microsoft Yammer, Workplace by Facebook and Slack by securing against intellectual property and confidential data leaks, insider threats, HR policy violations, compliance issues and external sharing risks.

As a critical part of an organization's overall security fabric, Wiretap encourages and facilitates safe collaboration by monitoring files and conversations, as well as blocking material or communication that could place a company at risk.
