## A Smart Solution for Linen Management

### What is Executor<sup>®</sup>NET?

ExecutorNET is our powerful, web-based distribution and tracking tool. For over 30 years, Encompass has been the leader in healthcare linen tracking tools and support, and the current generation of ExecutorNET delivers an exceptional level of service and ease of use.

Using ExecutorNET's data input and reporting features, linen managers can easily maintain detailed records of item quantities, weights, and charges for order restocking. Your personnel can use this information to pinpoint cost and usage excesses by order, department, or customer.

**ExecutorNET users can also track their usage of linen items and departments compared to a national average database of other ExecutorNET users, a powerful benchmarking feature.**

ExecutorNET employs restocking information in a sophisticated, easy-to-use fashion to help you get your job done faster. For example, ExecutorNET can use today's restocking quantities to generate tomorrow's bulk linen requirements.

We have built ExecutorNET to accommodate even the busiest, most complex facilities. Whether your facility utilizes outside linen support or an on-premise laundry, ExecutorNET is sure to make your daily accounting procedure quicker and easier than ever imagined.

## Key Benefits of ExecutorNET:

- Accurately track linen expenses by department
- Set appropriate par levels by department
- Benchmark utilization by department
- Set budgets by department
- Compare utilization against National Averages
- Measure compliance and effectiveness of linen policies
- Help determine replacement needs
- Supply physical inventory requirements
- Identify product life and loss statistics
- Identify theft problems

## Key Features of ExecutorNET:

- Enter daily linen counts, calculate item requirements, print daily and weekly picking forms, and globally adjust par or required quantities based on available linen stock
- View dashboard gadgets to quickly analyze daily cart stocking status
- Access your information within or outside your facility using web browsers
- Secure Login
- Automatic secure backups and software updates
- Automatic calculation for delivery requirements
- Create and view robust and dynamic usage and utilization reports quickly and accurately
- Email and save reports in PDF or Microsoft Excel formats
- Integrate mobile devices to improve productivity and increase data accuracy.
- Initial database set-up completed for customer prior to implementation of program

## Hand-held Interface:

- Enjoy the convenience of a mobile tablet to reduce to time and labor needed to enter restocking information and increase data accuracy
- Sync the tablet using your facility's wireless network
- Capture data in real time with our online program
- Improves efficiency and accuracy of data collection

## System Requirements:

### Optimal Access

- Internet Explorer 8.0 or Safari Browser
- Wi-Fi Network (for hand-held download)
- Minimum Screen Resolution of 1024 x 768
- Microsoft Silverlight

### Report/Graph Printing/Viewing

- Adobe Acrobat reader
- Microsoft Excel
- Laser or Ink Jet printer
