

PPE - NONWOVEN DISPOSABLE ISOLATION GOWNS

Techstyles® nonwoven disposable isolation gowns help promote healthier environments by providing quality infection control barriers for staff and visitors.

Proper selection of protective apparel is essential to successfully limiting exposure and reducing potential cross-contamination as rapidly emerging health threats continue to challenge facilities nationwide.

Our isolation gowns are available in a wide variety of styles and performance rated materials from standard fluid-resistance to impervious and three AAMI protection levels.

Better care starts
with safety and comfort.

LET ENCOMPASS BE YOUR GUIDE TO BETTER PROTECTION

AAMI Classification Levels of Barrier Performance

AAMI classified gowns are required to meet strict testing requirements for the entire isolation gown, including the front, back, sleeves and seams as these are all considered critical zones as shown.

Critical Zones

AAMI Level	Applicable Test	Required Result	Exposure Risk
1	AATCC 42 - Impact Penetration Test	≤ 4.5 g	Minimal
2	AATCC 42 - Impact Penetration Test AATCC 127 - Hydrostatic Pressure Test	≤ 1.0 g ≥ 20 cm	Low
3	AATCC 42 - Impact Penetration Test AATCC 127 - Hydrostatic Pressure Test	≤ 1.0 g ≥ 50 cm	Moderate

Encompass Non-AAMI Fluid Resistance Classifications

Encompass offers a wide variety of gowns that are not AAMI classified due to construction characteristics. To assist you in properly identifying the fluid resistance capabilities of these items, please use the following category descriptions and look for the category icon next to the catalog numbers.

SYMBOL GLOSSARY

ICON	CLASSIFICATION	FLUID EXPOSURE RATING	SUGGESTED ENVIRONMENT
	Fluid Resistant	Designed for low exposure. The level of fluid resistance is minimal.	Protects against the possible occurrence of minimal splashing and spraying.
	Fluid Guard	Designed for moderate exposure. The level of fluid resistance is moderate.	Protects against the likely occurrence of moderate splashing and spraying.
	Fluid Barrier	Designed for high exposure. The level of fluid resistance is high.	Protects against the probable occurrence of spraying and limited soaking.
	Impervious	Designed for the highest exposure. <i>Passes ASTM F1670, Standard Test Method for Resistance of Materials Used in Protective Clothing to Penetration by Synthetic Blood and ASTM F1671, Standard Test Method for Resistance of Materials Used in Protective Clothing to Penetration by Blood-Borne Pathogens Using Phi-X174 Bacteriophage Penetration as a Test System.</i>	Protects against soaking or strike through.

*American Society of Testing and Materials (ASTM)

Final selection must consider the degree of exposure risk for various procedures and be determined by the purchaser. Encompass provides no warranty against transmission of blood-borne diseases. For more information about our protection products, please contact your Encompass sales representative.
