

Better care starts with safety and comfort.

synergy 

Synergy™ Professional Apparel now offers two new exciting styles — a long-sleeve top for OR settings, and a modesty-panel v-neck top.

Synergy™ Professional Apparel perfectly blends durability and value with a fashionable variety of styles and colors.

All styles are made of Synergy fabric, a durable poly-rich blend that is comfortable, opaque and quick drying. Synergy fabric offers minimal shrinkage and is fade and wrinkle resistant.

And we are now introducing two new styles with features designed with the caregiver and AORN guidelines in mind.

NEW STYLES

1. MODESTY NECK - STYLES 46834 - 46840

- A little extra coverage on neck area provides modesty for the caregiver

2. BARRIER SLEEVES - STYLE 46834

- Barrier sleeves aid in reducing the dispersion of dead skin scales or squames into the OR and hospital air.
- Less skin exposure aids in reducing the skin to skin contact between patient and the caregiver
- Fulfills the AORN guidelines for surgical attire recommending covering of arms

HOW TO CREATE AND ORDER A CATALOG NUMBER

Each staff apparel catalog number consists of 3 parts:

GARMENT STYLE CODE,
2-DIGIT COLOR/PRINT
CODE AND SIZE CODE.

Replace the “_” in the garment style code with the appropriate color/print code and size code, starting with the color print code
