

Tired of spending countless hours

replacing your conveyor belt on

your finishing machine?

Introducing the Hinged Lace Conveyor Belt

BRAND

NEW

Benefits

This new hinged lace conveyor belt greatly reduces the hours of labor associated with replacing endless conveyor belts. This new design eliminates excessive down time and numerous hours adjusting and leveling the machine table. In addition, this new design is used to replace the conventional metal clipper lacing notorious for its dead zone and dangerous metal hooks.

Installation is easy and takes less than an hour. No need to hire a costly service technician or tie up your high paid maintenance personnel for hours to install this belt.
