

what to ask your injector

simple questions to ensure your safety, quality and results

1. experience

- education
 - arizona injectors can be any medical professional (physicians, nurses, nurse practitioners, and dentists)
- on the job training
 - looking for regular, continuing education, hours in aesthetics training
- # of injections per month
 - medspa models vary, many injectors are also doing laser, plastic surgery or even dentistry but some, like Derma Health are all day, every day and each injector averages about 1000 injections/mo

2. quality

- complaints? how many? why? how resolved?
- do you have a quality system? can you describe that?
 - looking for a system to ensure results and follow up, how are the products stored, is there a shelf life, are medical issues tracked

3. outcomes

- want natural results, how do you achieve that?
- examples of Before & After pictures
 - looking for several actual patients' recent photos

4. issues

- if there is a problem or I don't like it, what can you do?
 - the most common fillers are made of hyaluronic acid and can be dissolved with an injection, others are more permanent
- what are potential adverse reactions?
- how can you prevent bruising at the injection sites?

5. next steps

- what should I expect as "normal" today and in following days?
- will you follow up with me and how?
- what should I do if I have a concern?
 - looking for an immediate contact or plan for emergency care
- what are next steps in my personal treatment plan?
