

ARDEX ENGINEERED CEMENTS

ARDEX Engineered Cements' ARDEX X 32 Warranty

The following ARDEX product is approved for installation in conjunction with FLEXSNAP™ by FLEXTHERM, Inc.:

- Ardex X 32™ Microtec® Exterior Self-Drying Thin-to-Thick Bed Mortar

When installed in accordance with ARDEX's written recommendations and in conjunction with ARDEX grouts, the use of ARDEX X 32 to install tile with the FLEXSnap system qualifies the installation for an ARDEX/HENRY SystemOne™ 10-Year Limited Flooring Installation Warranty.

In addition to the above, please note that it is ARDEX's recommendation that all substrates be constructed in accordance with all applicable TCNA guidelines.

As always, please be advised that prior to installing any ARDEX product, ARDEX recommends installing an adequate number of properly located test areas, including the selected tile, to determine the suitability of the products for the intended use. It is essential that samples of the proposed tile, as well as the ARDEX underlayment, ARDEX X 32, be placed and evaluated on site prior to proceeding with the actual installation.
