

TKM PolyPrint®

Made in Germany

TKM PolyPrint is used primarily with water-based inking and varnishing systems and as a containment blade in flexographic printing. The blade prevents cutting injuries and scoring lines, since no metallic particles accumulate in the inking system.

Given the wide variety of application requirements, we also offer TKM PolyPrint in other materials in addition to polyester, and in different tip shapes.

Advantages

- Containment blades
- All water-based inking systems
- Prevents injuries
- Avoids scoring lines
- Customer-specific tips and shapes
