

# WHAT TO CONSIDER WHEN PLANNING YOUR OMNIRIM CONVERSION

## KEY ITEMS TO CONSIDER FOR A SUCCESSFUL TRANSITION

### WHAT TO CONSIDER

The OmniRIM product will officially reach end of life support in 2020

How to ensure a smooth transition to a new system, including data integrity and security

Avoid any interruption in RIM processes and ensure the new system delivers on core functionality

Will the data in your current system need to be migrated to the cloud?

What other systems/other line of business applications should connect to our new RIM system?

Maintaining support and business continuity during transition to new product

### HOW WE CAN HELP

Begin to evaluate not only modern software platforms like Infolinx but your future RIM needs

Infolinx has over 30 years experience in the market, trusted by several other organizations to handle their OmniRIM conversions

Infolinx delivers core features built for modern needs. Maintain compliance and get powerful retention, disposition, workflows, and security functionality

If yes, Infolinx is available in the cloud with extensive experience migrating legacy OmniRIM systems to the cloud

Sync from other systems via Infolinx data connectors - from offsite vendors, ECM/DMS systems, to multiple file shares/drives

All of our services, including product support are done in-house - our experienced team ensures a painless transition
