

servicenow™

servicenow™ -as-a-service

STAND-ALONE?

Your organization wants to manage the ServiceNow platform on its own.

CUSTOMIZED?

You seek advanced customization options to tailor your instance specifically to your business processes.

IN-HOUSE EXPERTISE?

You work for a large, complex organization where:

- capital expenditures are well within your budget;
- the scale of your operations justifies the purchase of all departmental modules;
- You already have a team of in-house experts who can devote themselves to all ServiceNow configuration and maintenance requirements.

***Sound like you? Then ServiceNow is your best choice!**

OR

HOSTED?

You want to take full advantage of ServiceNow, but do not want to bother with upgrades or managing an instance.

OR

OUT-OF-THE-BOX?

You want a ready-to-use version of ServiceNow that will allow for rapid time-to-value and a prescribed path to efficiencies and ROI.

OR

LIMITED ACCESS TO EXPERTS?

You work for a small-to-mid-sized organization where:

- upfront implementation costs present a challenge to your budget;
- you are looking to start small and scale as your company grows;
- your access to ServiceNow expertise is limited or non-existent, which means additional money needs to be spent in resource recruitment so you can smoothly maintain and administer the platform.

***Sound like you? Then ServiceNow®-as-a-Service is your best choice!**
