

47mm Polypropylene Disc Holder

Instructions for Disc Installation

CHP 47 mm Polypropylene Disc Holders come standard with EP O-ring and ¼-inch MNPT inlet and outlet connections. It is designed to hold 47mm filter discs provided in packages like the one pictured below.

Filter Disc Installation

1. Holding the downstream part of the disc holder with the screen up, carefully place the filter disc on the screen with the disc edges closely aligned with the edges of the screen.
NOTE: Be sure to place the disc with the "Flow Side" UP. The flow side is designated on the disc package.

2. Position the upstream part of the disc holder and turn clockwise to assemble the holder with the filter disc in place. Turn until the upstream and downstream parts are seated. **DO NOT OVERTIGHTEN** or the holder may be damaged.

3. Attach tubing using 1/4" Female NPT fittings to the downstream and upstream Male NPT fittings on the holder. **DO NOT OVERTIGHTEN**, the holder may be damaged. The holder is now ready for use.
