

Digital Transformation Disruptors in the Automotive Supply Chain

Machine Learning

Machine learning and predictive analytics are reducing defects and improving customer experience.

IoT Devices

Inexpensive IoT (Internet of Things) devices are being used to trigger maintenance needs.

Modern Solutions

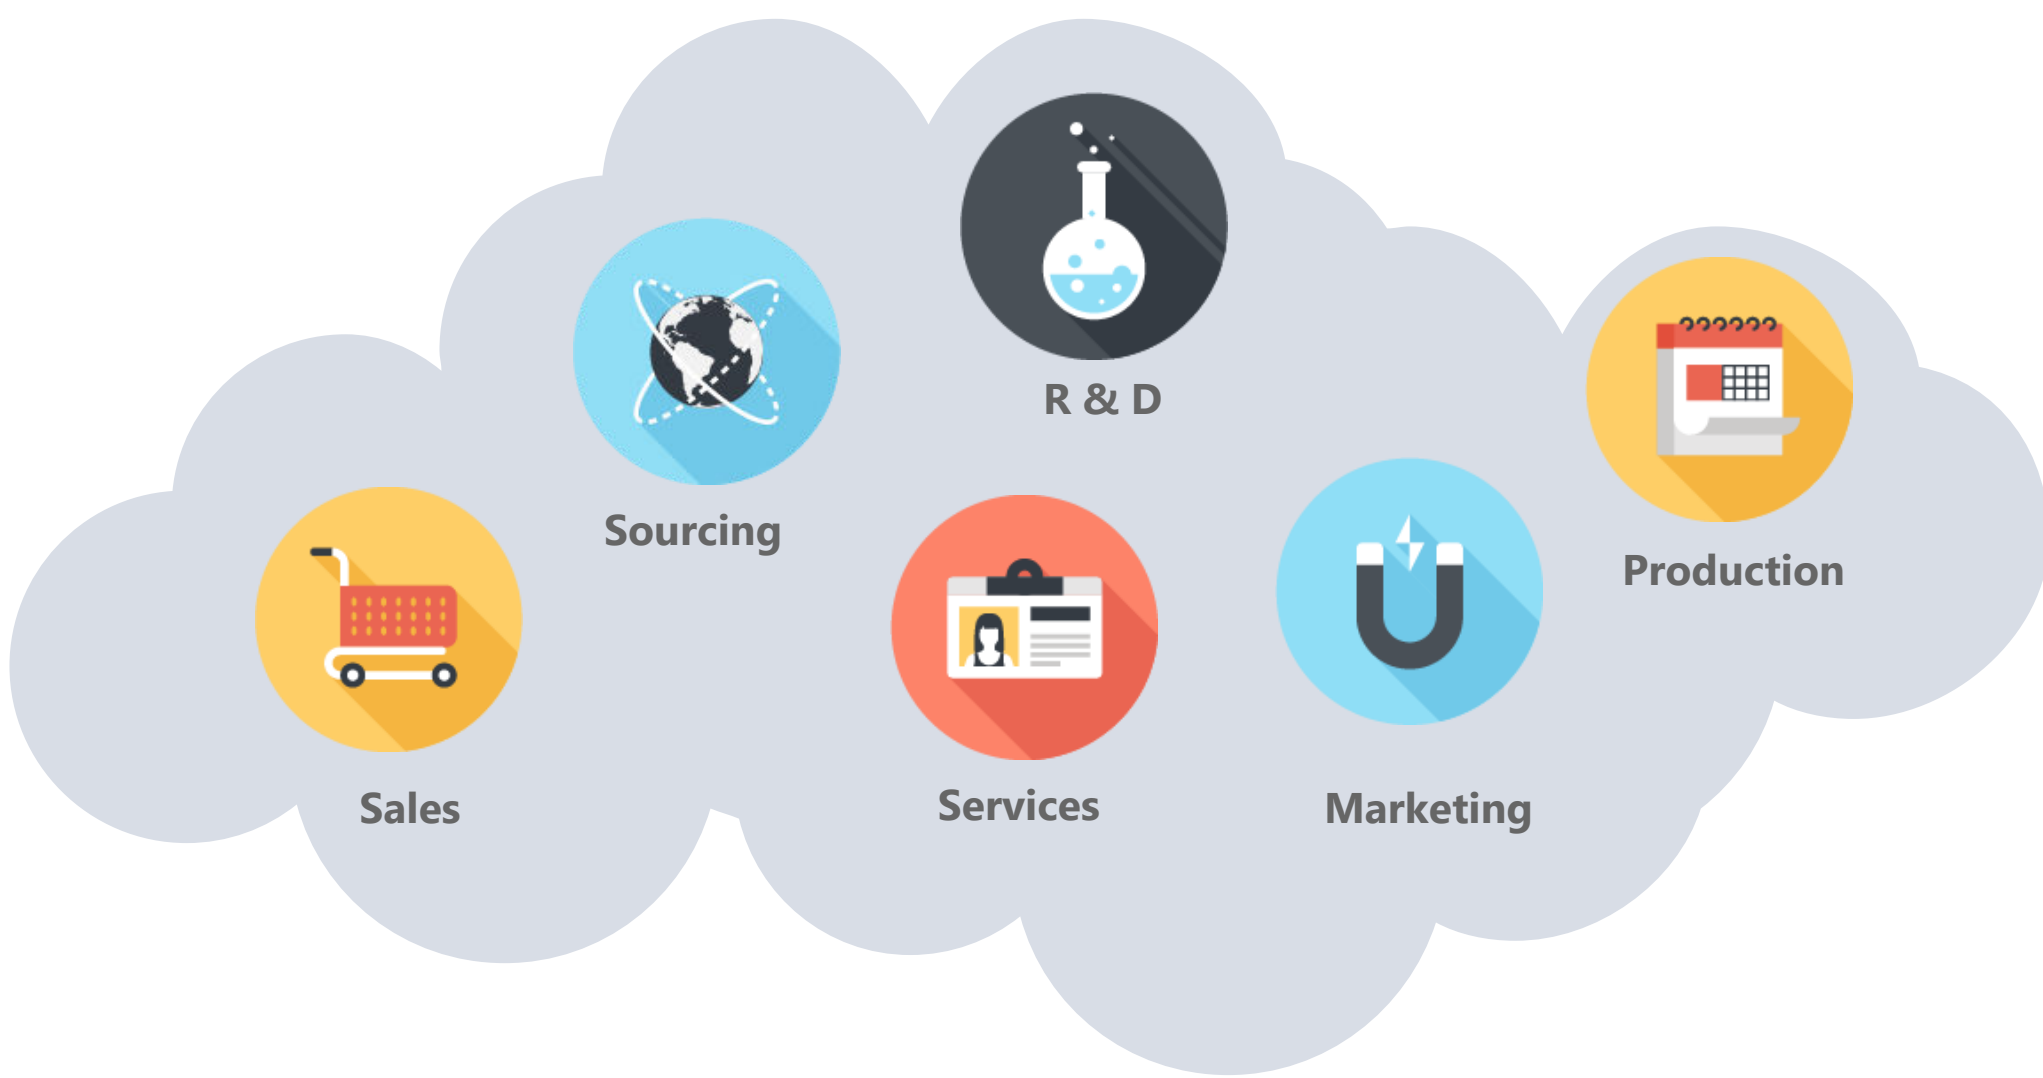

Automotive solutions, like [AutoCONNECT](#), can efficiently handle program and bid response management.

Modern ERP

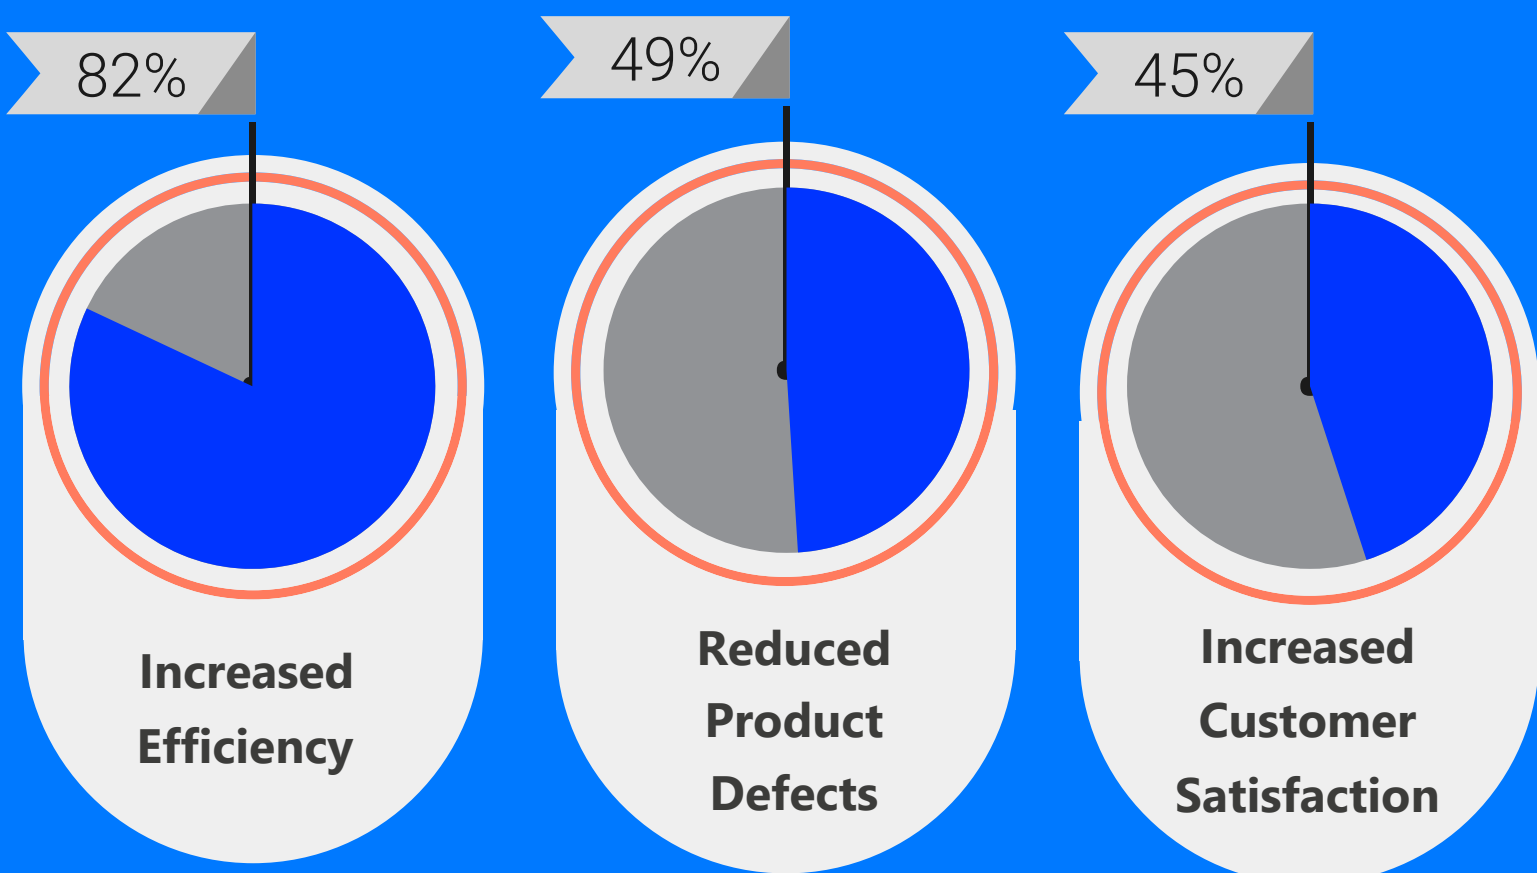

Modern software like Dynamics 365 keeps your manufacturing environment connected.

Connectivity is changing every aspect of the automotive supply chain.

CREATING MEASURABLE RESULTS

percentage of manufacturers reporting improvements

THE FUTURE IS DIGITAL

<p>Connect Things</p>	<p>Control Anything</p>	<p>Gain Insights</p>	<p>Take Action</p>
<p>75B</p> <p>connected devices by 2025</p>	<p>\$1.5M</p> <p>average increase in operating increase</p>	<p>30%</p> <p>of the data on earth will come from IoT by 2025</p>	<p>\$5B</p> <p>market for business process automation tools by 2025</p>

ARE YOU READY?

www.MCAConnect.com

Leading manufacturing, energy and service companies around the world rely on MCA Connect to help them drive business performance.
