# CLOUD OPTIMISATION SERVICE

---

**Large, or ever-increasing cloud costs?** Comprehensively review and analyse existing cloud deployments to realise significant savings and performance improvements; Re-engineer 'lift-and-shift' deployments to optimise value and performance for the cloud.

## WHY CLOUD OPTIMISATION?

---

Contact Ltd.'s Cloud Optimisation Service provides a comprehensive review & re-engineering of your Cloud environment to maximise the full potential of existing cloud deployments, reducing costs and optimising performance across five core areas:

- **Cloud assets:** e.g. CPU, memory, disk and network consumption
- **Costs:** Unexpectedly high cloud bills? Understand how your public cloud is really performing.
- **Usage:** Granular insight and understanding of current cloud usage patterns & workloads.
- **Performance:** Comparison & analysis of performance data.
- **Security:** Assessment of security configurations & best practice recommendations.

## BENEFITS OF CLOUD OPTIMISATION

---

Optimising your existing cloud environment can yield significant benefits – particularly cost reduction, but also scalability and performance improvements, and simplicity of on-going management. Here are some of the advantages you will benefit from with Contact's Cloud Optimisation Service:

### ➤ REDUCED COSTS

Unexpectedly high cloud bills? Gain visibility of your utilisation and optimise cloud services to pay for only what you need.

### ➤ ENHANCED PERFORMANCE.

Review, re-engineer and re-imagine your cloud applications to enhance performance and utilisation - at a reduced cost.

### ➤ IMPROVED SCALABILITY.

Workload optimisation to enhance cloud scalability & elasticity, adjusting capacity to only pay for the resources you use.

### ➤ SIMPLER CLOUD MANAGEMENT

Optimised cloud workloads to enable simpler management and reporting.

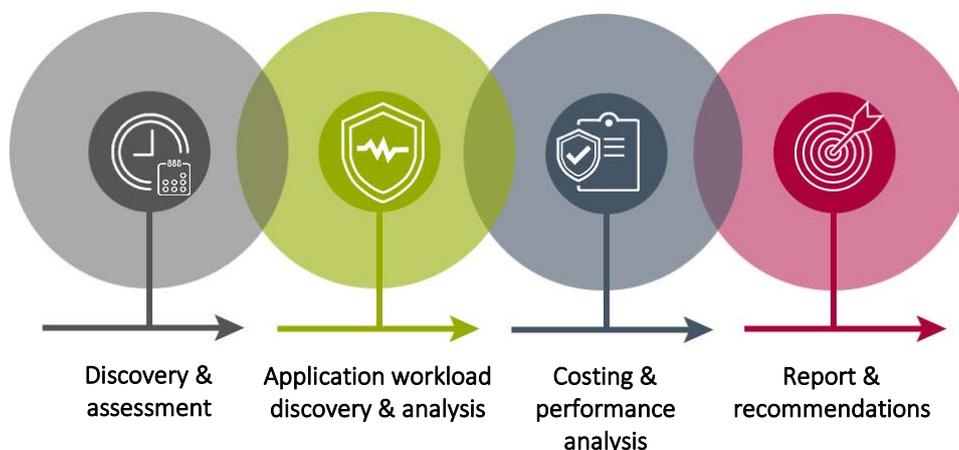

### ➤ ACTIONABLE INTELLIGENCE

Detailed recommended actions for either your team or Contact's cloud specialists to implement for you.

## SERVICE DETAILS

At Comtact, we understand that every client is unique, with differing requirements when it comes to cloud migration and optimisation. This is the why we adopt a personalised approach to help guide your path towards a fully tailored solution.

To help simplify the journey, Comtact's Cloud Optimisation Service follows four phases to review your current services, identify improvements, build a security posture and and protect your critical assets.

1

### DISCOVERY & ASSESSMENT

Discovery phase to understand key operations, workloads & objectives.

- Key business operations, workloads & objectives.
- Governance & compliance requirements.
- Understand existing application architecture, tiers & resources.

2

### APPLICATION WORKLOAD DISCOVERY & ANALYSIS

Analysis of cloud technologies, applications & workloads.

- Discovery & analysis of applications, technologies and workloads.
- Workload optimisation to enhance cloud scalability & elasticity.

3

### COSTING & PERFORMANCE ANALYSIS

Analysis of existing applications & infrastructure for optimisation, including detailed cost analysis.

- Cost/benefit analysis, mapped to target objectives & identified optimisation improvements.
- Estimated cloud consumption vs. current cloud & future estimated spend.
- TCO analysis.

4

### REPORT & RECOMMENDATIONS

Comprehensive report on findings, including a detailed Statement of Works.

- Identified optimisation recommendations.
- Full costing analysis
- Detailed Statement of Works to complete the identified recommendations.

## KEY DELIVERABLES

The Cloud Optimisation Service includes a comprehensive assessment and report on the finding by Contact's specialists:

### TCO ANALYSIS

Detailed cost-forecasting exercise to understand future cloud consumption requirements, based on existing workloads, comparing overall costs between your current cloud spend and future estimated spend.

### ACTIONABLE RECOMMENDATIONS AND REPORT

Detailed report on the finding with recommendations & graded benefits, to evaluate potential saving and service improvements.

### STATEMENT OF WORKS

Statement of Work detailing the recommendations, for either the client of Contact's cloud specialists to implement.

## ABOUT CONTACT LTD

Operating 24/7, Contact Ltd. is a specialist Cyber Security and IT Managed Service Provider, supporting clients day and night from our ISO27001-accredited UK Security Operations Centre (SOC).

Since 2005, Contact has worked tirelessly to transform and secure many of the UK's leading businesses, working in long-term partnerships to drive innovation, agility and performance.
