# CYBERSECURITY SERVICES

## Managed Security Programs

IGI's managed security services are long-term, proactive, and comprehensive strategies brought to your organization by a team of highly-skilled cybersecurity professionals. By bundling services together, our clients can enjoy the benefits of cost reduction, continuity, and risk mitigation at their highest levels.

### Available Services

*Our packages include all or some of the following options:*

- Nodeware Vulnerability Management
- External Penetration Testing
- Internal Penetration Testing
- Physical Security Reviews
- Security Awareness Training
- Social Engineering
- SIEM & SOC as a Service
- Virtual CISO
- Compliance
- Quarterly Security Reports

### Why Choose Managed Security

The average cost of the IGI Managed Security program is often less than the cost of one full-time internal Chief Information Security Officer. Your organization does not need to worry about security employee turnover, tools, education, certifications, or continuity. IGI brings the best-of-breed security solutions, tools, techniques, and knowledge to your organization in a package that fits your budget and unique business requirements. Protect your organization today by deploying a managed security program by IGI.
