

Security Awareness Training

Your employees can be the weakest link in your security chain or your first line of defense against cyber attacks. Training helps make them an asset, not a liability.

Why Training Matters

- 99% of breaches are due to human error
- 93% of phishing emails involve ransomware
- 91% of cyberattacks start with phishing
- 1 in 5 SMBs are a target of a cyber attack
- 46K new phishing sites are created daily
- U.S. businesses pay \$500 million annually in phishing scams

What's Included

Training Courses

- Library of 25 interactive courses, including compliance courses

Phishing Simulator

- Raise awareness while testing employees and measuring success

Management

- Auto-scheduling and one-click launch

The Benefits

- Reduce Business Risk
- Meet Compliance Requirements
- Save Money

Start training your employees to help prevent cyber incidents and protect your critical data.
