Going circular

EREMA North America invites to Los Angeles

30th April 2019

We waste every year millions of tons of valuable plastic material by sending it to landfills & overseas or worse it ends up in the ocean. Discover what it takes and what the possibilities are for going circular using post consumer Plastics.

Dear Ladies and Gentlemen,

Please join us on April 30th, 2019 for a day of discovery and education how plastic recycling can actually work at the La Kretz Innovation Campus (LACI) in downtown Los Angeles.

This event is your chance to explore in-depth how plastic recycling works, what's possible with the latest recycling technologies and what kind of quality products can be made from these materials. The event will be interactive, with an emphasis on practical solutions. We have invited a variety of stakeholders and speakers to explore the entire value chain from concepts such as design for recycling, plastic material recovery, the technology behind post-consumer plastic processing and how to turn them into quality products again (and again).

To name just a few of the applications to be showcased: Bottle-to-Bottle, Bottle-to-Bagpack, Agricultural Film, Plastic Bag, Packaging Film and Ocean Bound Plastic recycling.

To kick off the event we will explore what's driving plastic recycling, the challenges and the opportunities. We can ensure you that you will have an informative, pleasurable and useful experience and EREMA North America would love to host you at the LKIC.

See you there – a must attend event if plastic recycling is on the top of your priorities.

Martin Baumann

VP Sales

EREMA North America

Mike Horrocks

CEO

EREMA North America

10.00 - 10.15 **Welcome reception and registration**

Recycling is NOT dead

10.15 - 10.45 Where do we stand, what needs to be done. We are in a challenging environment but with that much change going on there are opportunities abound

Best Practice – design for recycling – where it all starts, creating quality products that can have a second life

10.45 - 11.30 *Association of Plastics Recyclers – John Standish*

11.45 - 12.30 **Lunch**

Track 1 - Workshop: Post consumer film recycling

Opportunities for Westcoast film recyclers since the Chinese shut down

Delta Plastics - Cherish Changala Miller, VP - Corporate Marketing & Communications

State-of-the-art recycling for film – washing and sorting technologies

Lindner Washtech – Tomas Kepka, North America

12.30 - 2.30

Processing post-consumer film materials – limitations and opportunities

e.g. why is not every trash bag made from post consumer materials?

EREMA, Extruders – Martin Baumann, North America

Round Table / Discussion

Track 2 - Workshop - Post consumer regrind recycling

HDPE bottle recycling in context of the ocean plastic pollution plastic crisis

Envision – Recycler, Sandra Lewis, West Coast

Bottle to Bag – Starting up a circular economy company

8hz - Mateo Neri, Co-founder & CEO (Transitioning single use plastic into products)

Bio plastics – savior or menace in the service ware world?

Bioplastic Recycling - Brian Chung, CEO

Round Table / Discussion

Quick Flash – examples of what can be done and made from post consumer materials

e.g. Command Packaging – film

e.g. Seventh Generation – cleaning products

e.g. Consumer Goods – examples from Europe

Wrap up presentations and discussions
