

TIDYSPAN®

by

Alpine™
BUILDINGS NZ LTD

ATS01

Tidy Outside

The Tidyspan range is custom designed to suit your requirements.

ATS02

Tidy Inside

Pre-dried timber framing reduces interior noise & condensation.

Phone 0800 428 453 or visit www.alpinebuildings.co.nz for more information

ATS03

Simple, Strong & ...

A very smart & robust 18.0m design with bird-proof rafters and steel legs.

The benefits of an Alpine Tidyspan® structure will give you many reasons to appreciate the investment you make:

- ✓ Unlike other steel portal designs, there is nowhere for birds to perch in the roof cavity. This is achieved by using box section rafters, and bolting purlins between these.
- ✓ Like all Alpine structures, the Tidyspan is custom designed to your requirements and engineered to meet the wind & snow loads at your proposed location.
- ✓ The purlin cleats are already attached to rafters, eliminating onsite welding.
- ✓ Ideal combination of steel portals for strength and timber framing which helps to reduce noise.
- ✓ A concrete floor is optional for all of Alpine's construction methods, meaning Tidyspan buildings are also perfect for large clearspan wintering sheds, horse arenas and other structures where a floor is not required.

ATS04

... Easy to Install

The Alpine Tidyspan is designed and engineered to your proposed location.

Phone 0800 428 453 or visit www.alpinebuildings.co.nz for more information

ATS05

Bulk Storage

Timber framing makes it simple to nail or screw in work-benches, shelves or lining.

ATS06

Vehicle Collections

The minimalist clearspan design helps you optimise storage space and work areas.

ATS07

Industrial Workshops

Easy to install, with timeframes to get your business up and running quicker.

The steel rafters come with a pre-camber for extra strength and the purlin cleats are already welded on. No need to screw on any brackets or do any onsite welding!

The tough purlin cleats are welded onto the rafters. Simply slot the purlins in and bolt through the holes.
