solutions

## STANDARD FEATURES AND FUNCTIONS

- Colour touch screen
- Up to 20 programmable jobs memory
- Load 'n Go automatic settings
- Up to 4000 envelopes per hour
- FlexFeed multi-format feeder
- Multiple sheet feeding
- Up to 6 feeders
- PowerFold folding capacity up to 10 sheets (80gsm)
- Fold types; letter, zigzag, single, double, parallel or no fold
- 725 sheets document feeder capacity
- 325 envelope feeder capacity
- 60gsm to 250gsm document weight
- Document sizes; 90mm to 356mm height, by 130mm to 230mm width
- Envelope sizes; 90mm to 162mm length, by 160mm to 248mm width
- 2.5mm set thickness
- Optional side exits
- Secure 'n Feed duplicate document detection
- Accumulate before feeding function
- Optional Barcode Reader (BCR)
- Optional Optical Mark Recognition (OMR)
- Optional Mail Piece Production Control (MPPC)
- Tip to Tip sealing

The easy-to-use Folder Inserter that grows with your business.

- Easy to use - easier than a photocopier
- Load'N Go - no operator training required
- High productivity in a very small footprint
- Low noise level - for any environment
- Modular - it can grow with your business

Quick, versatile and easy to use, with sophisticated process controls to manage content. Full page reading capability allows flexible use of document intelligence marks. Modular design caters for current and future needs.

Everybody can use the DPS 85. The reverseable full colour touch screen and load'n Go will both give you ultimate ease-of-use. No need for trained operators thanks to load'n Go. Just load documents and envelopes 'n press the button to Go! The DPS 85 will adjust all settings automatically and even save them to the memory for instant recall.

To avoid stoppages and maximise efficiency, the intelliDeck diverts duplicate or faulty documents before folding while the system is still running. The high capacity vertical stacker will reduce incidences of unloading, thus enabling other tasks to be done in the meantime. It requires less handling and makes it possible to unload up to 500 envelopes every 8 minutes while running at maximum speed.

Thanks to Neopost's unique flexFeed technology, you can load any document size in each of the 6 feeders. The variety in applications is up to you. Furthermore, you don't need to fan documents before loading. The Manual Feed mode allows you to process up to 10 sheets fed by hand, stapled or unstapled. Ideal for personalising mail for just one or a few individual recipients. It provides you with a professional looking mail piece with all the benefits of DPS 85's mail processing.

Collating documents before folding them is not only faster than collating them in the envelope, it also ensures a perfect presentation and reduces the risk of jamming. With powerFold you can crisply and quietly fold up to 10 pages in single fold and 8 pages in tri-fold. The clam shell design of the DPS 85 allows easy access to the folder.

Thanks to its exclusive scanning device, the DS-85 can read any type of coding such as OMR 1 and 2 tracks and 1D barcodes. Furthermore, the code can be printed anywhere on the document. This unique feature provides full flexibility to fulfil any layout requirement. To securely process personalised mail runs and those with a varying volume of documents per set, the DS-85 includes several automatic features to ensure that every recipient receives precisely the right mail piece.

- Reading of sequencing marks allows you to control printing accuracy and inserts can be selected based on customer profile.
- Optional Integrity Checking Software ensures 100% accurate mail processing.

Neopost's Output Management Software (OMS-100) will get the best out of each and every one of your documents.

- Automatically add Barcode at the right place to drive your folder inserter.
- Remove your old OMR marks, giving more value to your document.
- Select inserts from multiple trays.
- Guarantee your mail integrity with secure control marks.
- Split your print file based on number of pages.

Neopost offers you the security that your printed jobs are actually being mailed. Mail Piece Production Control adds a unique ID to each letter within the address block and builds up an audit trail for each production job. Equipped with MPPC, your DS-85 can scan a barcode on every mail piece. This ensures total quality control of your mail batch and identifies missing or out-of-sequence letters. All in all this provides you with real-time quality control and detailed line-item reports:

- Assurance that jobs are accurate and complete.
- Real-time failure detection of missing or 'out-of-order' mail pieces.
- A hard-copy 'Proof of Mailing' report for each mail production job.

## DPS Service, Flexibility and Innovation

Digital Post Solutions is one of the fastest growing franking machine suppliers in the UK, and, for good reason. We offer excellent customer service, flexible contracts and competitive finance. We constantly strive to work with our customers in ways that mutually benefit us both.

Our range and capability of our franking machines are superb quality too. We have challenged the normal franking machine industry approach and our customers are reaping the rewards of working with us. With over 2500 customers, our client base ranges from SME's and Start Ups to large corporate chains and public sector branches. All using our franking machines to their advantage.

Despite our rapid (and continued) growth we remain true to our founding principles. An ethos built upon providing our customers with excellence in all areas of their franking machine and postal needs - while maintaining financial and corporate responsibility. This has enabled manufacturers to identify with our high-level, in-house sales teams who provide the most innovative and effective products to market in the quickest time possible

A history built on customer-focused thinking. Founded in 2004 and with over 40 years of combined industry experience our founding ethos was simple...

'To provide innovative and outstanding products in order to maximise our customers' Mailstream - at an affordable price'.
