

## GET LEADING OPENSHIFT EXPERTISE FROM THE FIRST OPENSIFT PARTNER

As the first OpenShift partner, we've led many successful implementations. Over time, we have developed the processes, automation playbooks, templates, and insights that position us as preferred consultants for high-impact engagements. We assess customer readiness, implement OpenShift, and enhance existing implementations.

Our 2017 publication **Non-Functional Requirements for OpenShift Implementations** is a high-demand resource on our website. The document captures dozens of insights that position implementations for success, no matter the context.

The 2018 **Vizuri OpenShift Mind Map** is our latest external publication, building on this sustained interest. In 2018, we are announcing the release of our OpenShift Mind Map, which formalizes the technical decisions and conversations you may want to consider when planning your OpenShift implementation.
