Disclosure: This illustration shows the minimum adjusted income for a single individual investing at age 60 assuming no withdrawals for 5 years. It utilizes B-share contracts and does not apply state variations. It does not account for any potential step-ups that could generate a higher income, especially for those benefits that allow a higher percentage of equity exposure, as well as the benefits that allow stacking. Current as of January 2nd 2019, withdrawal percentages and roll-up rates are subject to change.

Income Rate: Individual investing at 60, benefit base increasing by guaranteed roll up rate, then withdrawing money at 65 for life at income rates. Showing income rate from initial investment.

Possible Decrease: Income rate can decrease if account value is depleted
