

DLP NETWORK PROFESSIONAL SERVICES

When configured and deployed correctly, McAfee Network DLP delivers a coordinated, proactive defense against data loss both accidental and malicious. McAfee Network DLP ensures compliance for your organization and allows organizations to safely move data to cloud based services.

SCOPE OF ENGAGEMENT

DG Technology will provide implementation services to fulfill the requirements of this Statement of Work as described. All work will be done via remote session with your team.

The scope of work under this engagement will be limited to McAfee Network DLP Manager, Monitor, Prevent and Discover. It is assumed the client will ensure physical or virtual appliances are racked, cabled and have an IP Address assigned.

PROJECT TASKS PERFORMED DURING THE ENGAGEMENT:

DLP STRATEGY AND CONFIGURATION

- Discuss DLP Strategy and organizational requirements
- Review DLP rule planning spreadsheet and questionnaire (Questionnaire will be provided in advance)
- Identify repositories to be scanned by DLP Discover
- Identify DLP Discover appliance locations
- Identify DLP Monitor appliance locations
- Identify DLP Prevent appliance locations
- Upgrade DLP appliance and integrate with the manager
- Connect DLP Monitor to a SPAN port

DLP POLICY CREATION

- Enable DLP policies in Discover and Monitor
- Configure DLP Prevent with one email gateway and one web gateway
- Perform testing of installed
- Scan up to 1 repository with DLP Discover

DLP DOCUMENTATION

- Provide DLP Run book
