

SIEM HEALTH CHECK

An Expert Analysis of Your System's Security

When configured and deployed correctly, a SIEM delivers a coordinated, proactive defense against malicious threats and attacks, and ensures compliance for your organization.

The **SIEM Health Check Service** from DG Technology provides an analysis of your existing SIEM environment to determine proper operation and identify any misconfigurations. This will provide you with the functionality you need out of your security investment.

SCOPE OF ENGAGEMENT

DG Technology will provide implementation of services to fulfill the requirements of this Statement of Work as described. Approximately half the work will be done via remote session with your security team, with the remaining being used preparing reports and analysis. All work will be done remotely. The scope of work under this engagement will be limited to the SIEM environment.

PROJECT TASKS PERFORMED DURING THE ENGAGEMENT:

- Identify any missing patches/updates/hotfixes
- Completely review the SIEM architecture and functionality
- Review correlation rules
- Review event count
- Review policy inheritance
- Recommendations/Best Practices

DELIVERABLES

- Complete review of existing SIEM deployment
- Define best practices
- Complete documentation of SIEM configuration
- Identification of any pain points or non-functioning features
- Documentation of next steps to ensure a stable environment
