

# ePO/VIRUSSCAN QUICK START

When configured and deployed correctly, McAfee ePO delivers a coordinated, proactive defense against malicious threats and attacks, and ensures compliance for your organization.

## SCOPE OF ENGAGEMENT

A DG Technology expert will work hand-in-hand with you to remotely configure your new ePO server based on best practices. We work with you to build out and provide the basic framework for your team to ensure a successful implementation.

The scope of work under this engagement will be limited to the McAfee ePO product and related VirusScan.

## PROJECT TASKS PERFORMED DURING THE ENGAGEMENT:

A DG Technology expert will work hand-in-hand with you to remotely configure your new ePO server based on best practices from hundreds of installs. We work with you to build out and provide the basic framework for your team to ensure a successful implementation.
