

*Amsterdam API Summit: March 15, 2017*

# Mitigate Threats in your API Architecture

**Moderator:** Martin Kuppinger- Founder and Principal Analyst, KuppingerCole

**Speakers:**

Martin Kuppinger - Founder and Principal Analyst, KuppingerCole  
Jason Macy - CTO, Forum Systems  
Menno Abbink - Service Line Manager, Experis Ciber B.V.  
Erik Logtenberg - Team Lead Java/.Net, equensWorldline

**Agenda:**

- 12:30 - 13:00 Pre-summit guest registration and Coffee/Tea
  
  - 13:00 - 13:15 Welcome  
*Bruce Herron, VP Worldwide Sales, Forum Systems*
  
  - 13:15 - 14:00 API Security Management for Secure API Strategies  
*Martin Kuppinger, Founder and Principal Analyst, KuppingerCole*
  
  - 14:00 - 14:45 Top 10 API Vulnerabilities and How to Prevent Them  
*Jason Macy, CTO, Forum Systems*
  
  - 14:45 - 15:00 Coffee/Tea Break
  
  - 15:00 - 15:45 API's in the Financial Industry and Security  
*Erik Logtenberg, Team Manager Java/.Net at equensWorldline*
  
  - 15:45 - 16:30 The API Economy and New Business Models  
*Menno Abbink, Service Line Manager, Experis Ciber B.V.*
  
  - 16:30 Drinks & Possibility to view demo's:  
  
*Integrating to the Azure IoT Hub (without coding) - A Forum Sentry API Integration Demonstration*  
  
*Integrating Salesforce to SharePoint (without coding) - A Forum Sentry API Integration Demonstration*
-

*Amsterdam API Summit: March 15, 2017*

## Mitigate Threats in your API Architecture

**Martin Kuppinger** is Founder of the independent Analyst Company KuppingerCole and as Principal Analyst responsible for the KuppingerCole research. In his 25 years of IT experience he has already written more than 50 IT-related books and is known as a widely-read columnist and author of technical articles as well as reviews and is also a well-established speaker and moderator at seminars and congresses. His interest in Identity Management dates back to the 80s, when he also gained considerable experience in software architecture development. Over the years, he added several other fields of research, including virtualization, cloud computing, overall IT security, and others. Having studied economics, he combines in-depth IT knowledge with a strong business perspective.

**Jason Macy** is CTO of Forum Systems and responsible for innovation and product strategy for global operations. Jason has been a leading visionary for enterprise architecture design and successful deployment API identity and security technology. With hundreds of deployments worldwide, Jason's unique ability to pragmatically solve complex, industry use cases and provide sustained engineering initiatives continues to forge the leadership role of Forum Systems product technology. Jason is also responsible for the architecture and lifecycle of technologies that comprise the API testing and API simulation product lines. Earlier in his career, Jason worked as the lead architect for Raytheon and was responsible for deployment, acceptance testing, and successful commissioning of the Air Traffic Control system currently live and in use at Schiphol Airport in Amsterdam, Holland.

**Erik Logtenburg** is a person on a mission: To boost innovation! He is therefore a strong proponent of Agile & DevOps and is skilled in Cloud Technology, Security and Privacy. Erik has held positions as Developer, General Manager and Team Manager at Elmo ICT Solutions, Vevida and currently equensWorldline. He is a regular speaker at events on API's and Security. Next to his professional career Erik is also active at several non-for-profit organisations.

His specialties: Managing teams, Agile & DevOps Methodologies, Cloud, Security, Privacy, Architecture and Application Development.
