How Mango Languages’ Proficiency Scale Compares to ACTFL and CEFR Proficiency Levels

The Mango Proficiency Scale helps track learner progress to clearly identify their skill level and track specific achievements as they progress through the Mango learning system. The goals defined by the Mango Proficiency Scale will also assist learners in identifying content that may serve a given need or purpose for them outside of the linear progression of their courses.

Mapping Mango learning content to international levels of proficiency

Mango’s most popular language courses (French, Latin American Spanish, Italian, Brazilian Portuguese, Japanese, Levantine Arabic, German, Russian, and Mandarin Chinese) provide five units of robust content that takes learners to a Skilled 3 proficiency level and effectively challenge learners at a range of proficiency levels similar to those of ACTFL Novice Low – Distinguished and CEFR A1 – C2.
