Survey Methodology

Survey Framework

What is Engagement?

- Engagement is its own complex state; engagement **is not** job satisfaction, pride, or happiness. Rather, engagement is comprised of **vitality**, **immersion**, and **dedication**.
- Knowing that engagement influences overall performance is critical to driving **high** performance in your current workforce.
- Both the organization and employees have control over these aspects of engagement.

Glossary of Terms

- **Distribution of Favorability:** Shows the general proportion of **favorable** responses (“strongly agree” and “agree”), **neutral**, and **unfavorable** responses (“disagree” and “strongly disagree”).
 - Why we use red, gray, and purple: To meet 508 compliance regulations for visual impairments.
- **Response Scales:** All structured response questions use a 5-point Likert scale. There were 2 standard open-ended question types.
- **Rounding:** The sum of % **favorable**, **neutral**, and **unfavorable** scores may add up to 99 or 101.
- **Δ:** The difference between two numerical values. Here, the Δ is used to show the difference between your organization’s and the benchmark’s favorability scores.
- **Reverse Score:** Some items are reverse scored, meaning those who answered **favorably** answered “strongly disagree”/“disagree” or “highly unlikely”/“unlikely” to some items.
- **Item:** Synonymous with survey “question.”

Survey Administration

Employees accessed the survey **1/1/20 – 1/14/20** via **unique email link**.

The survey was available in both English and Spanish.

Anonymity threshold: **5**.
No groups with fewer than 5 respondents are reported.

Survey Benchmark Details

- The benchmark survey was sourced in March of 2020 with more than 1,800 respondents.
- The benchmark spans across a variety of industries, including:
 - Business & Information
 - Education
 - Finance & Insurance
 - Health Services
 - Manufacturing
 - Retail
 - Technology & Engineering
- Organizations represented in the benchmark ranged in size, from 100 – 10,000 or more employees.

The background of the slide features a grayscale photograph of two hands shaking in a firm grip. The hand on the left is adorned with several beaded and braided bracelets. The hand on the right wears a dark wristwatch. A large, semi-transparent green rectangle is positioned over the lower half of the image, containing the title text. The overall composition suggests themes of partnership, agreement, or collaboration.

Overall Summary

Survey Participation Detail

Gender	# Respondents	% of Respondents	# in Population	% of Total Population	Response Rate
Female	375	54%	434	51%	86%

Key Driver Results

About the Key Driver Analysis

- Key driver analyses (KDAs) are used to **understand which survey categories have the most influence on the following outcomes:**
 1. Engagement
 2. Intent to Stay
- The key driver analysis indicates which survey categories are driving the outcomes **in order of influence**, starting with the most impactful.
- Key drivers are only conducted for groups ~100+.
- The next few slides will provide the top drivers for each outcome.

*see appendix for a more detailed description of the Key Driver Analysis methodology

About the Key Driver Analysis

- When analyzing key drivers, consider the following:
 - Key drivers can **positively** or **negatively** influence Engagement or Intent to Stay.
 - If a key driver is a highly favorable category, an assumption could be made that it is having *positive* influence on the outcome (e.g., Engagement).
 - The opposite applies as well: if a key driver is a highly unfavorable category, it may be having a *negative* influence on the outcome.
 - Key drivers are recommended areas to focus improvement efforts because they are *predictive* of the outcomes of Engagement or Intent to Stay.
 - You will see the best ROI when organizational efforts are made towards the key driver categories.
 - If a key driver is assumed to be *positively* influencing an outcome, keep up the good work and focus on maintaining the positive perceptions in these areas.

Top Drivers of Engagement
