Everything you know about wireless has changed

Millimeter waves combine the best parts of fiber and wireless so you get capacity and reliability of fiber, along with the flexibility, speed of deployment and affordability of wireless

Physically Immune to Interference

The best wireless immunity is born, not made. Our systems use narrow beams that are naturally impervious to all other signals - no jamming, no interference, and complete security. When combined with the abundant millimeter wave spectrum and high reuse factor, you can guarantee reliability even in the most dense urban areas.

Mission Critical Reliability & Security

Used in dozens of safe cities world-wide, Siklu hacker-proof radios are chosen for their network survivability. Even during a security disaster you can be sure your network will not get jammed due to heavy Wi-Fi traffic or malicious intent.

Ready Set Go

Our new PtMP plug & play radios require no setup or alignment, just a lightning quick one-person installation. Operation is over the unlicensed planning-free 60GHz band.

20X Spectrum

10X Capacity

4X Reliability

1/3X Footprint

1/8X Latency
