

Forced air blows. Radiant is superior.

Discover **Viega Heating and Cooling Solutions**.  
A cleaner, more design-friendly, more efficient way  
to control temperature within a space.

**Connected in quality.**

## Put the control back into climate control.

Uneven air. Poor-quality circulation. A burden to interior designs and a drag on efficiency. It's no surprise that forced air blows. Luckily, Viega **Heating and Cooling Solutions** improve the climate experience for everyone. With use of radiant heating and cooling technology, Viega brings more control to architects who design with it, contractors who install it and customers who experience it. Finally, there's a whole new comfort zone with Viega Heating and Cooling Solutions.

### Cool, warm and all temperatures in between.

Instead of blowing air that circulates in the room, a hydronic radiant system controls floor temperatures, maintaining consistent room temps, eliminating dust and keeping your clients comfortable.

### Improves the environment. Inside and out.

Zone control options provide flexibility for controlling the temperature in several areas within a building at once. These highly efficient operating parameters can ultimately reduce energy.

### Eliminates the breeze (except upon installation).

Viega radiant solutions can be installed faster than traditional radiant systems, helping contractors achieve more in a day.

### Spreads comfort. Not dust or pollen.

By reducing the amount of air being circulated, radiant heating and cooling improves the air quality within a space, enabling customers to breathe easy.

### A higher ceiling for design opportunity.

With radiant heating and cooling, there's no need for a dropped ceiling to accommodate an HVAC system. This opens up the space to new design possibilities.

## Get the installation assistance you need.

Viega offers nearly everything you need for a radiant heating or cooling solution. And we'll be there to show you how our products can integrate with third-party systems.

### Important technologies:

01

#### **Viega Climate Mat**

Arrives on the job in a pre-engineered assembly that simply needs to be unrolled and fastened, saving time and labor costs by eliminating guesswork. Pre-pressurized and numbered for accurate placement, this system allows for 20,000 square feet of tubing to be installed in an average workday.

02

#### **Viega Rapid Grid**

An all-in-one insulated vapor barrier and grid system compatible with Viega Barrier PEX and Viega FostaPEX tubing. Viega Rapid Grid serves as a fastener, insulation and vapor barrier and can reduce installation time.

03

#### **Viega Climate Panels**

Easy to install and can be customized to suit any floor plan. Available assembled or unassembled for new or remodeled homes and businesses.

04

#### **Lightweight Tracks and Plates**

Ideal for retrofitting projects.

05

#### **Viega Zone Valves**

Used to control the flow of fluid within a hydronic heating or cooling system. Available in two sizes and three different connection configurations.

06

#### **Hydronic Mixing Block**

Combines mixing, control, air elimination and a pump in a single unit. It's a first-of-its-kind, highly-engineered, user-friendly, economical solution for controlling the radiant heating system.

Beneath the surface and behind the scenes,  
we're always there for you.

Located throughout North America, Viega's radiant sales team is trained to offer the best advice and expertise on design methods, installation techniques, product specifications and industry expectations.

### **Let us help you design your vision.**

From specification to design services to a complete bill of materials, our team members are always ready to help you identify the systems that will work best for your project. We also provide you with the tools, components and support you need to get the job done right. Whether the project is a small residential bathroom or a 200,000-square-foot commercial property, we'll be by your side every step of the way.

### **Comprehensive training for a changing industry.**

With experienced instructors, customized class options and innovative training solutions, Viega provides the best training in the industry. We offer a range of classes for the radiant heating industry, but we also believe in industry-related education, which is why our training goes beyond just product-specific instruction to provide a foundation our customers can build on. Viega Seminar Center attendees are able to take what they learn in our classes and expand their knowledge base exponentially as they continue throughout their careers.

Forced air, we're not a fan.

*"The consistency of radiant heating is so much more attractive because of its energy efficiency, comfort and quietness. We have peaked ceilings, so we're not paying to heat those since radiant heat doesn't rise [like forced air]. Our daughter has bad allergies, so we wanted to avoid forced air systems as they often contribute to more dust in the air."*

- Gina Schley, Homeowner, Colorado

*"It's quite tall inside this workshop, and the owners wanted to keep the heat down near the floor. There are large doors and people are in and out all the time. Using radiant worked."*

- Victor Mangano, Owner, T.M. Contracting

*"Our air heaters kick on a lot less in this facility over the winter [with radiant]. It forces moisture off the pool deck, which is a nice thing, and in the changing areas, it's pleasant to walk on warm tile. It enhances the customer experience."*

- Liam Goudekot, Aquatics Director, FINS

Bring confidence back to heating and cooling.
