CYNET PARTNER PROGRAM

CYNET 360 OVERVIEW
CyNet transforms breach protection, replacing legacy stacks of multiple security products with a single platform that consolidates and integrates endpoint, network and user protection.

THE CYNET PARTNER PROGRAM
CyNet views partners as its true force multipliers and dedicates focused efforts to build power relationships to drive mutual business at scale.

CyNet’s partners get continuous support by CyNet’s Marketing, Sales and Technical teams, to ensure rapid and efficient sales cycles from initial meeting to production deployment.

KEY BENEFITS

Rapid Time to Value
CyNet smart agent auto-deploys itself with full environment coverage in minutes.

Single Consolidated Platform
CyNet 360 provides the widest offering in a single platform to cater to multiple use cases and security needs.

Complete Attack-Surface Coverage
Coverage from endpoint, user and network-based attacks in a single solution.

24x7 Security Team
CyNet’s world-class analysts and researchers are available 24x7 for any customer-related issue.

Flexible Deployment Options
Full protection with on-premise, cloud and hybrid solutions.

SOLUTION PROVIDERS & RESELLERS
Resell a highly differentiated platform that comprises both native integration of NGAV, EDR, Network Analytics, UBA and Deception functionalities, as well as 24/7 SOC services.

MSPS & MSSPS
Provide a full breach protection service with a cost-effective single platform that converges critical endpoint, user and network security functionalities, which otherwise would require multiple products to deliver.

INCIDENT RESPONDERS & CONSULTANTS
Use CyNet 360 for free, to accelerate and optimize your response workflows with lightspeed visibility into investigated environments, advanced forensic tools, automated threat detection and a complete set of remediation actions.
AUTONOMOUS BREACH PROTECTION ESSENTIALS

To qualify as Autonomous, a breach protection platform must deliver three pillars: prevention and detection of all common and advanced threats, full automation of the entire response flow from initial detection to complete eradication of the malicious activity and continuous monitoring of this process by a security professionals to ensure and elevate the precision and quality of the process.

XDR

Endpoint Protection
Multilayered protection against malware, ransomware, exploits and fileless attacks

Network Protection
Protecting against scanning attacks, MITM, lateral movement and data exfiltration

User Protection
Preset behavior rules coupled with dynamic behavior profiling to detect malicious anomalies

Deception
Decoy files, machines, user accounts, and network connections to lure and detect advanced attackers

SECURITY AUTOMATION

Investigation
Automated root cause and impact analysis

Finding
Actionable conclusions on the attack’s origin and its affected entities

Remediation
Elimination of malicious presence, activity and infrastructure across user, network and endpoint attacks

Visualization
Intuitive flow layout of the attack and the automated response flow

MDR

Alert Monitoring
Prioritize and notify customer on critical events

Attacks Investigation
Detailed analysis reports on the attacks that targeted the customer

Proactive Threat Hunting
Search for malicious artifacts and IoC within the customer’s environment

Incident Response Guidance
Remote assistance in isolation and removal of malicious infrastructure, presence and activity

PREVENTION IS A STEP. PROTECTION IS A JOURNEY

Protection must be end to end. Prevention or Detection of an attack’s instance is critical – but it’s only the beginning. One must assume that the malicious artifact that was identified is a mere tip of an iceberg. Cynet 360 is the only solution that triggers an automated investigation following each endpoint, user or network alert, fully disclosing its root cause and scope and applying all the required remediation activities.
