

A Story of Units®

GR3 MOD 1-4

Practice

Eureka Math helps students truly understand mathematics and connect it to the real world, preparing them to solve problems they have not encountered. Great Minds teachers and mathematicians believe that it is not enough for students to know the process for solving a problem; they need to understand why that process works.

Eureka Math presents mathematics as a story, one that develops from grades PK through 12. In *A Story of Units*, our elementary curriculum, this sequencing has been joined with methods of instruction that have been proven to work, in this nation and abroad.

Great Minds is here to make sure you succeed with an ever-growing library of resources, including free tip sheets, resource sheets, and full grade-level modules at eureka-math.org.

Sequence of Grade 3 Modules

Module 1: Properties of Multiplication and Division and Solving Problems with Units of 2–5 and 10

Module 2: Place Value and Problem Solving with Units of Measure

Module 3: Multiplication and Division with Units of 0, 1, 6–9, and Multiples of 10

Module 4: Multiplication and Area

Module 5: Fractions as Numbers on the Number Line

Module 6: Collecting and Displaying Data

Module 7: Geometry and Measurement Word Problems

EUREKA MATH

What does this painting have to do with math? Turn this book over to find out.

On the cover

Vincent van Gogh (1853–1890). *The Starry Night*. Saint Rémy, June 1889. Oil on canvas, 29 × 36 1/4" (73.7 × 92.1 cm).

Acquired through the Lillie P. Bliss Bequest.

Location: The Museum of Modern Art, New York, NY, U.S.A.

Digital Image © The Museum of Modern Art/Licensed by SCALA/Art Resource, NY

What does this painting have to do with math?

In an effort to take advantage of every opportunity to build students' cultural literacy, Great Minds features an important work of art or architecture on the cover of each book we publish. We select images that we know students and teachers will love to look at again and again. These works also relate, in visual terms, to ideas taken up in the book. Who can look at the night sky and not think of counting? Or of the shapes that form the constellations? The arrangement of the stars, moon, and planets particularly intrigued Vincent van Gogh, who painted twenty-one images of the sky as seen from his bedroom.
