Loaner Program Overview

Do you ever find yourself overwhelmed with options? Whatever the situation, the more choices you have, the harder it can be to decide what to get. In the retail industry they call this phenomenon "FOMO" or Fear Of Missing Out. As the number of options available to us increases, so does our anxiety about picking the perfect item.

Choosing the right rugged high-performance computer is no exception to the rule. You need to consider multiple factors:

Is it going to work with your application?
What is the life cycle of the computer system?
If anything goes wrong, will the manufacturer provide support?
Does the benefit of getting a new computer system outweigh the cost?
The list goes on and on…

Just like you wouldn't buy a car without test driving it, or buy a house without a walkthrough inspection, why can't you buy a rugged high-performance computer without knowing exactly what you're getting first?

At Trenton Systems, we understand this apprehension, which is why we started the Trenton Systems Loaner Program.

How it works

You can borrow any of our products for 45 days **FREE** of charge.

What's game?

Every product or component qualifies for the Loaner Program. Want to test our new motherboard? Maybe you need a new Processor Board? You may even need an entire system. You tell us what you want!

And Returns?

If you are ready to return the equipment, simply put the items you don't want back in the box and ship it back to us. It's really that simple.

We Stand By You

We want YOU to decide whether Trenton Systems is a good match for you.

"Our Engineers are your Engineers" - you'll hear us say this phrase quite often. Just another great benefit of the Loaner Program. You have full access to our Engineering Department for the entirety of your trial period. You get to interact with our Engineers. We are here to help you succeed and solve any problems you may encounter.

Get In Touch

Trenton Systems Loaner Program is available to qualified candidates. Call, chat, or email us today to learn more. Our Trenton Systems Engineers are happy to help answer any of your questions and help match the right high-performance computing products to your exact specs & requirements.
