Notes:

- 18" Slide Rails w/Bracket, Solid Bearing -- Part Number 198500001066-00
- Individual 18" rack slide part number – 107500001060-00
- 20" Slide Rails w/Bracket, Solid Bearing -- Part Number 198500001015-00
- Individual 20" rack slide part number – 107500001055-00
- 24" Slide Rails w/Bracket, Solid Bearing -- Part Number 198500001016-00
- Individual 24" rack slide part number – 107500001057-00
- 30" Slide Rails w/Bracket, Solid Bearing -- Part Number 198500001068-00
- Individual 30" rack slide part number – 107500001077-00
- Extension bracket (two are included in each kit) and have an individual part number of 107500001056-00
- Mounting screw hardware is included in each rack slide kit

Rack Slide Kit Usage Table

The choice of rack slide kit is largely dependent on the component rack enclosure or transit case depth dimension and not so much on the chassis depth dimension. Most standard 19” component racks have a 30” depth dimension and each rack slide kit comes with two 7.25” adjustable mounting bracket extensions for use with the rack slides. That means that in most applications any one of available Trenton Systems slide rail kits will work in a standard 19” component rack. The following table provides suggestions on the optimum rack slide kit that could be used with a specific Trenton Systems’ rackmount computer. However, you may wish to use the longer slide kit with your specific installation.
